ULTIMUS MANAGERS TRUST

WAVELENGTH INTEREST RATE NEUTRAL FUND

Supplement to the Summary Prospectus, the Prospectus and the Statement of Additional Information, each dated July 10, 2022

This supplement updates certain information in the Summary Prospectus, the Prospectus and the Statement of Additional Information (the “SAI”) of the Wavelength Interest Rate Neutral Fund (the “Fund”), a series of Ultimus Managers Trust, to revise information contained therein as described below. For more information or to obtain a copy of the Summary Prospectus, Prospectus, or the SAI, free of charge, please contact the Fund at 1-866-896-9292.

Notice is hereby given that effective as of August 25, 2022, the Fund will change its name to “Wavelength Fund”.

If you have any questions regarding the Fund, please call 1-866-896-9292.

Investors Should Retain this Supplement for Future Reference

Statement of Additional Information
July 10, 2022

WAVELENGTH INTEREST RATE NEUTRAL FUND
(WAVLX)

Series of
ULTIMUS MANAGERS TRUST
225 Pictoria Drive, Suite 450
Cincinnati, Ohio 45246

This Statement of Additional Information (“SAI”) should be read in conjunction with the Prospectus for Wavelength Interest Rate Neutral Fund (the “Fund”) dated July 10, 2022, which may be supplemented from time to time (the “Prospectus”). This SAI is incorporated by reference in its entirety into the Prospectus. Because this SAI is not itself a prospectus, no investment in shares of the Fund should be made solely upon the information contained herein. Copies of the Prospectus may be obtained without charge, upon request, by writing the Fund at P.O. Box 46707, Cincinnati, Ohio 45246-0707, or by calling toll-free 1-866-896-9292 or by visiting the Fund’s website at www.wavelengthfunds.com.

STATEMENT OF ADDITIONAL INFORMATION

Wavelength Interest Rate Neutral Fund (the “Fund”) is a diversified series of Ultimus Managers Trust (the “Trust”), an open-end management investment company. The Trust is an unincorporated business trust that was organized under Ohio law on February 28, 2012. The Fund’s investments are managed by Wavelength Capital Management LLC (the “Adviser”). For further information on the Fund, please call 1-866-896-9292 or visit the Fund’s website at www.wavelengthfunds.com.

ADDITIONAL INFORMATION ON INVESTMENTS, STRATEGIES AND RISKS

Information contained in this SAI expands upon information contained in the Prospectus. All investments in securities and other financial instruments involve a risk of financial loss. Investors should carefully review the descriptions of the Fund’s investments and associated risks described in the Prospectus and this SAI. No assurance can be given that the Fund’s investment program will be successful. No investment in shares of the Fund should be made without first reading the Prospectus.

General Investment Risks. Prices of securities in which the Fund invests may fluctuate in response to many factors, including, but not limited to, the activities of the individual companies whose securities the Fund owns, general market and economic conditions, interest rates, and specific industry changes. Such price fluctuations subject the Fund to potential losses. In addition, regardless of any one company’s particular prospects, a declining stock market may produce a decline in prices for all securities, which could also result in losses to the Fund. Market declines may continue for an indefinite period of time, and investors should understand that during temporary or extended bear markets, the value of all types of securities, including securities held by the Fund, can decline.

Market Risk. Market risk is the risk that the value of the securities in the Fund’s portfolio may decline due to daily fluctuations in the securities markets that are generally beyond the Adviser’s control, including fluctuation in interest rates, the quality of the Fund’s investments, economic conditions and general market conditions. Certain market events could increase volatility and exacerbate market risk, and could result in trading halts, such as changes in governments’ economic policies, political turmoil, environmental events, trade disputes, terrorism, military action and epidemics, pandemics or other public health issues. Any of the foregoing market events can adversely affect the economies of one or more countries or the entire global economy, certain industries or individual issuers, and capital and security markets in ways that cannot necessarily be foreseen or quickly addressed.

As shown with the novel coronavirus disease (COVID-19), market events (including public health crises and concerns) can have a profound economic and business effect that results in cancellations and disruptions to supply chains and customer activity, disruption and displacement of one or more sectors or industries, closing of borders and imposition of travel restrictions and quarantines, general public concern and uncertainty and, in extreme cases, exchange trading halts due to rapidly falling prices. Additionally, the impact of COVID-19 has caused significant volatility and declines in global financial markets, including the U.S. financial markets. Further, COVID-19 has led to production cutbacks for many companies and coupled with changes in consumer spending fueled by government stimulus, created a supply/demand imbalance and resulted in higher prices and inflation, the result of which can affect a company’s financial condition and ability to manufacture and sell its products.

Market events such as these and other types of market events may cause significant declines in the values and liquidity of many securities and other instruments, and significant disruptions to global business activity and financial markets. Turbulence in financial markets, and reduced liquidity in equity, credit and fixed income markets may negatively affect many issuers both domestically and around the world, and can

result in trading halts, any of which could have an adverse impact on the Fund. During periods of market volatility, security prices (including securities held by the Fund) could change drastically and rapidly and therefore adversely affect the Fund.

Equity Securities. The Fund may invest, directly or indirectly through exchange traded funds (“ETFs”) in equity securities. The equity portion of the Fund’s portfolio will generally be comprised of securities traded on domestic securities exchanges. The prices of equity securities in which the Fund invests may fluctuate in response to many factors, including, but not limited to, the activities of the individual companies, general market and economic conditions, interest rates, and specific industry changes. Such price fluctuations subject the Fund to potential losses. In addition, regardless of any one company’s particular prospects, a declining stock market may produce a decline in prices for all equity securities, which could also result in losses for the Fund. Market declines may continue for an indefinite period of time, and investors should understand that during temporary or extended bear markets, the value of equity securities including securities held by the Fund, will likely decline.

Foreign Securities. The Fund may invest in securities issued by foreign governments or foreign corporations, directly or indirectly through ETFs or derivative transactions (e.g., foreign currency futures). The Fund also may invest in securities of foreign issuers that trade directly on United States (“U.S.”) stock exchanges or in the form of American Depositary Receipts (“ADRs”). The Fund defines foreign securities as any security issued by a company that meets at least one of the following criteria at the time of purchase:

- The company is organized under the laws of a foreign country.
- The company maintains its principal place of business in a foreign country.
- The principal trading market for the company’s securities is located in a foreign country.
- During its most recent fiscal year, at least 50% of the company’s revenues or profits were derived from operations in foreign countries.
- During its most recent fiscal year, at least 50% of the company’s assets were located in foreign countries.

ADRs are receipts that evidence ownership of underlying securities issued by a foreign issuer. ADRs are generally issued by a U.S. bank or trust company to U.S. buyers as a substitute for direct ownership of a foreign security and are traded on U.S. exchanges. ADRs, in registered form, are designed for use in the U.S. securities markets. ADRs may be purchased through “sponsored” or “unsponsored” facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depository. A depository may establish an unsponsored facility without participation by the issuer of the deposited security. The depository of an unsponsored ADR is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights with respect to the deposited security. Investments in ADRs are subject to risks similar to those associated with direct investments in foreign securities.

Investing in the securities of foreign issuers involves special risks and considerations not typically associated with investing in U.S. companies. The performance of foreign markets does not necessarily track U.S. markets. Foreign investments may be affected favorably or unfavorably by changes in currency rates, exchange control regulations and capital controls. There may be less publicly available information about a foreign company than about a U.S. company, and foreign companies may not be subject to accounting, auditing and financial reporting standards and requirements comparable to those applicable to U.S. companies. There may be less governmental supervision of securities markets, brokers and issuers of securities than in the U.S. Foreign securities may trade with less frequency and volume than domestic securities and therefore may exhibit less liquidity and greater price volatility than securities of U.S. companies. Changes in foreign exchange rates will affect the value of those securities which are denominated or quoted in currencies other than the U.S. dollar. Therefore, to the extent the Fund invests in

a foreign security which is denominated or quoted in a currency other than the U.S. dollar, there is the risk that the value of such security will decrease due to changes in the relative value of the U.S. dollar and the security's underlying foreign currency. Additional costs associated with an investment in foreign securities may include higher custodial fees than those applicable to domestic custodial arrangements, generally higher commission rates on foreign portfolio transactions, and transaction costs of foreign currency conversions. Investments in foreign securities may also be subject to other risks different from those affecting U.S. investments, including local political or economic developments, expropriation or nationalization of assets, restrictions on foreign investment and repatriation of capital, imposition of withholding taxes on dividend or interest payments, currency blockage (which would prevent cash from being brought back to the U.S.), limits on proxy voting and difficulty in enforcing legal rights outside the U.S. currency exchange rates and regulations may cause fluctuation in the value of foreign securities. In addition, foreign securities and dividends and interest payable on those securities may be subject to foreign taxes, including taxes withheld from payments on those securities.

Emerging Markets Investments. The Fund may invest directly and indirectly in emerging market equity and fixed-income securities. Emerging market countries may include, among others, countries in Asia, Latin, Central and South America, Eastern Europe, the Middle East and Africa. In addition to the general risk of investing in foreign securities and foreign fixed-income securities described above and below, investing in emerging markets can involve greater and more unique risks than those associated with investing in more developed markets. The securities markets of emerging countries are generally small, less developed, less liquid, and more volatile than securities markets of the U.S. and other developed markets. The risks of investing in emerging markets include greater social, political and economic uncertainties. Emerging market economies are often dependent upon a few commodities or natural resources that may be significantly adversely affected by volatile price movements against those commodities or natural resources. Emerging market countries may experience high levels of inflation and currency devaluation and have fewer potential buyers for investments. The securities markets and legal systems in emerging market countries may only be in a developmental stage and may provide few, or none, of the advantages and protections of markets or legal systems in more developed countries. Some of these countries may have in the past failed to recognize private property rights and have at times nationalized or expropriated the assets of private companies. Additionally, if settlements do not keep pace with the volume of securities transactions, they may be delayed, potentially causing the Fund's assets to be uninvested, the Fund to miss investment opportunities and potential returns, and the Fund to be unable to sell an investment. As a result of these various risks, investments in emerging markets are considered to be speculative and may be highly volatile.

Foreign Debt Securities. The Fund may invest directly or indirectly in non-U.S. based debt securities, including foreign currency-denominated corporate and foreign government notes and bonds. Investing in foreign debt securities has the same risks as investing in foreign securities generally. In addition, foreign corporate bonds are subject to the risks that foreign companies may not be subject to uniform audit, financial reporting or disclosure standards, practices or requirements comparable to those found in the U.S., which may make it more difficult to evaluate the business and/or financial position of the issuer and the value of the bond. Foreign government bonds are also subject to the risks that governmental issuers of debt securities may be unwilling to pay interest and repay principal when due or may require that conditions for payment be renegotiated.

Foreign Government Debt Obligations. The Fund may invest, directly or indirectly in sovereign debt obligations. Investments in sovereign debt obligations involve special risks which are not present in corporate debt obligations. The foreign issuer of the sovereign debt or the foreign governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due, and the Fund may have limited recourse in the event of a default. During periods of economic uncertainty, the market prices of sovereign debt, and the net asset value ("NAV") of the Fund, to the extent it invests in

such securities, may be more volatile than prices of U.S. debt issuers. In the past, certain foreign countries have encountered difficulties in servicing their debt obligations, withheld payments of principal and interest and declared moratoria on the payment of principal and interest on their sovereign debt.

A sovereign debtor's willingness or ability to repay principal and pay interest in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange, the relative size of the debt service burden, the sovereign debtor's policy toward principal international lenders and local political constraints. Sovereign debtors may also be dependent on expected disbursements from foreign governments, multilateral agencies and other entities to reduce principal and interest arrearages on their debt. The commitment on the part of these governments, agencies and others to make such disbursements may be conditioned on the implementation of economic reforms and/or economic performance and the timely service of such debtor's obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the governmental entity, which may further impair such debtor's ability or willingness to timely service its debts. Consequently, governmental entities may default on their sovereign debt.

Holders of sovereign debt may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities. In the event of a default by a governmental entity, there may be few or no effective legal remedies for collecting on such debt.

Foreign Exchange Risk and Currency Transactions. The value of foreign investments as measured in U.S. dollars may be affected favorably or unfavorably by changes in foreign currency rates and exchange control regulations. Currency exchange rates can also be affected unpredictably by intervention by U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the U.S. or abroad. Foreign currency exchange transactions may be conducted on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market or through entering into derivative currency transactions. Currency futures contracts are exchange-traded and change in value to reflect movements of a currency or a basket of currencies. Settlement must be made in a designated currency.

Forward foreign currency exchange contracts are individually negotiated and privately traded so they are dependent upon the creditworthiness of the counterparty. Such contracts may be used to (i) gain exposure to a particular currency or currencies as a part of the Fund's investment strategy, (ii) when a security denominated in a foreign currency is purchased or sold, or (iii) when the receipt in a foreign currency of dividend or interest payments on such a security is anticipated. With respect to subparagraphs (ii) and (iii), a forward contract can then "lock in" the U.S. dollar price of the security or the U.S. dollar equivalent of such dividend or interest payment, as the case may be. Additionally, when the Adviser believes that the currency of a particular foreign country may suffer a substantial decline against the U.S. dollar, it may enter into a forward contract to sell, for a fixed amount of dollars, the amount of foreign currency approximating the value of some or all of the securities held that are denominated in such foreign currency. The precise matching of the forward contract amounts and the value of the securities involved will not generally be possible. In addition, it may not be possible to hedge against long-term currency changes. Cross-hedging may be used by using forward contracts in one currency (or basket of currencies) to hedge against fluctuations in the value of securities denominated in a different currency. Use of a different foreign currency magnifies exposure to foreign currency exchange rate fluctuations. Forward contracts may also be used to shift exposure to foreign currency exchange rate changes from one currency to another. Short-term hedging provides a means of fixing the dollar value of only a portion of portfolio assets.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") includes foreign exchange forwards in the definition of "swap" as well as over-the-counter ("OTC")

derivatives and therefore contemplates that certain of these contracts may be exchange-traded, cleared by a clearinghouse and otherwise regulated by the Commodity Futures Trading Commission (the “CFTC”). The CFTC has been granted authority to regulate forward foreign currency contracts and many of the final regulations already adopted by the CFTC will apply to such contracts, however a limited category of forward foreign currency contracts were excluded from certain of the Dodd-Frank Act regulations by the Secretary of the U.S. Department of the Treasury (the “U.S. Treasury”). Therefore, trading by the Fund in forward foreign currency contracts excluded by the U.S. Treasury are not subject to the CFTC regulations to which other forward foreign currency contracts are subject.

Currency transactions are subject to the risk of a number of complex political and economic factors applicable to the countries issuing the underlying currencies. Furthermore, unlike trading in most other types of instruments, there is no systematic reporting of last sale information with respect to the foreign currencies underlying the derivative currency transactions. As a result, available information may not be complete. In an OTC trading environment, there are no daily price fluctuation limits. There may be no liquid secondary market to close out options purchased or written, or forward contracts entered into, until their exercise, expiration or maturity. There is also the risk of default by, or the bankruptcy of, the financial institution serving as a counterparty.

Currency swaps involve the exchange of rights to make or receive payments in specified currencies and are individually negotiated. The entire principal value of a currency swap is subject to the risk that the other party to the swap will default on its contractual delivery obligations. The Fund’s performance may be adversely affected as the Adviser may be incorrect in its forecasts of market value and currency exchange rates.

Debt Securities. The Fund may invest, directly or indirectly, in corporate debt securities and U.S. Government Obligations (as defined below). Corporate securities include, but are not limited to, debt obligations offered by public or private corporations either registered or unregistered. The market value of such securities may fluctuate in response to interest rates and the creditworthiness of the issuer. A debt instrument’s credit quality depends on the issuer’s ability to pay interest on the security and repay the debt; the lower the credit rating, the greater the risk that the security’s issuer will default. The credit risk of a security may also depend on the credit quality of any bank or financial institution that provides credit enhancement for the security. The Fund may purchase debt securities of any credit quality, maturity or yield. Accordingly, the Fund may purchase investment grade securities, meaning securities rated BBB or better by S&P Global Ratings (“S&P”) or Fitch Ratings, Inc. (“Fitch”), Baa or better by Moody’s Investors Service (“Moody’s”) or any comparable rating by another nationally recognized statistical rating organization (“NRSRO”) or, if unrated, as determined by the Adviser to be of comparable quality. In addition, the Fund may purchase lower-rated debt securities including, without limitation, “junk” bonds whose ratings are below investment grade.

U.S. Government Obligations. The Fund may, directly or indirectly, invest in U.S. Government Obligations. “U.S. Government Obligations” include securities which are issued or guaranteed by the U.S. Treasury, by various agencies of the U.S. government, and by various instrumentalities which have been established or sponsored by the U.S. government. U.S. Treasury obligations are backed by the “full faith and credit” of the U.S. government. U.S. Treasury obligations include Treasury Bills, Treasury Notes, and Treasury Bonds. Treasury Bills have initial maturities of one year or less; Treasury Notes have initial maturities of one to ten years; and Treasury Bonds generally have initial maturities of greater than ten years.

Agencies and instrumentalities established by the U.S. government include the Federal Home Loan Banks, the Federal Land Bank, the Government National Mortgage Association, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, the Small Business Administration, the Bank for Cooperatives, the Federal Intermediate Credit Bank, the Federal Financing Bank, the Federal Farm Credit Banks, the Federal Agricultural Mortgage Corporation, the Resolution Funding Corporation, the Financing Corporation of America and the Tennessee Valley Authority. Some of these securities are supported by the full faith and credit of the U.S. government while others are supported only by the credit of the agency or instrumentality, which may include the right of the issuer to borrow from the U.S. Treasury. In the case of U.S. Government Obligations not backed by the full faith and credit of the U.S. government, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, and may not be able to assert a claim against the U.S. government itself in the event the agency or instrumentality does not meet its commitment. U.S. Government Obligations are subject to price fluctuations based upon changes in the level of interest rates, which will generally result in all those securities changing in price in the same way, i.e., all those securities experiencing appreciation when interest rates decline and depreciation when interest rates rise. Any guarantee of the U.S. government will not extend to the yield or value of the Fund's shares.

LIBOR Risk. The Fund may be exposed to financial instruments that are tied to the London Interbank Offered Rate ("LIBOR"). LIBOR is used as a "benchmark" or "reference rate" for various commercial and financial contracts, including corporate and municipal bonds, bank loans, asset-backed and mortgage-related securities, interest rate swaps and other derivatives. Over the last several years, global regulators have indicated an intent to phase out the use of LIBOR. ICE Benchmark Administration, the administrator of LIBOR, ceased publication of most LIBOR settings on a representative basis at the end of 2021 and is expected to cease publication of a majority of U.S. dollar LIBOR settings on a representative basis after June 30, 2023. While some LIBOR-linked instruments may contemplate a scenario where LIBOR is no longer available by providing for an alternative rate-setting methodology, not all LIBOR-linked instruments have such provisions and there may be significant uncertainty regarding the effectiveness of any such alternative reference rate methodologies. Public and private sector industry initiatives, regulators and market participants are currently engaged in trying to identify potential successor reference rates, such as the Secured Overnight Financing Rate for U.S. Dollar LIBOR and the Sterling Overnight Interbank Average Rate for Sterling LIBOR. However, there still remains uncertainty regarding successor reference rate methodologies and there is no assurance that the composition or characteristics of any alternative reference rate will be similar to or produce the same value or economic equivalence as LIBOR or that instruments using an alternative rate will have the same volume or liquidity as did LIBOR prior to its discontinuance or unavailability. The transition process away from LIBOR could lead to increased volatility and illiquidity in markets for instruments whose terms currently rely on LIBOR. It could also lead to a reduction in the value of some LIBOR-linked investments and reduce the effectiveness of new hedges placed against existing LIBOR-linked investments. The transition away from LIBOR may also result in operational issues for the Fund and the Adviser, including the need of making regular fair valuation determinations. No assurances can be given as to the impact of the LIBOR transition (and the timing of any such impact) on the Fund and their investments. Furthermore, the risks associated with the expected discontinuation of LIBOR and transition may be exacerbated if the work necessary to effect an orderly transition to an alternative reference rate is not completed in a timely manner. All of the aforementioned may adversely affect the Fund's performance and/or NAV.

Below Investment Grade Debt Securities ("Junk Bonds"). Bonds rated below BBB by S&P, or Baa by Moody's, or an equivalent rating by another NRSRO are commonly known as "junk bonds." As noted above, the Fund may, directly or indirectly, invest in junk bonds. See "Description of Ratings" in Appendix B for further discussion regarding securities ratings. Below investment grade securities are deemed by the rating agencies to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal. Below investment grade securities, while generally offering higher yields than

investment grade securities with similar maturities, involve greater risks, including the possibility of default or bankruptcy. The special risk considerations in connection with investments in these securities are discussed below.

Below investment grade securities generally offer a higher yield than that available from higher-rated issues with similar maturities, as compensation for holding a security that is subject to greater risk. Below investment grade securities are deemed by rating agencies to be predominately speculative with respect to the issuer's capacity to pay interest and repay principal and may involve major risk or exposure to adverse conditions. Lower-rated securities involve higher risks in that they are especially subject to (1) adverse changes in general economic conditions and in the industries in which the issuers are engaged, (2) adverse changes in the financial condition of the issuers, (3) price fluctuation in response to changes in interest rates and (4) limited liquidity and secondary market support.

Effect of Interest Rates and Economic Changes. Interest-bearing securities typically experience appreciation when interest rates decline and depreciation when interest rates rise. The market values of below investment grade securities tend to reflect individual corporate developments to a greater extent than do higher rated securities, which react primarily to fluctuations in the general level of interest rates. Below investment grade securities also tend to be more sensitive to economic conditions than are higher-rated securities. As a result, they generally involve more credit risks than securities in the higher-rated categories. During an economic downturn or a sustained period of rising interest rates, highly leveraged issuers of below investment grade securities may experience financial stress which may adversely affect their ability to service their debt obligations, meet projected business goals, and obtain additional financing. Periods of economic uncertainty and changes would also generally result in increased volatility in the market prices of these securities and thus in the Fund's NAV.

Payment Expectations. Below investment grade securities may contain redemption, call or prepayment provisions which permit the issuer of such securities to, at its discretion, redeem the securities. During periods of falling interest rates, issuers of these securities are likely to redeem or prepay the securities and refinance them with debt securities with a lower interest rate. To the extent an issuer is able to refinance the securities, or otherwise redeem them, the Fund may have to replace the securities with a lower yielding security, which would result in a lower return.

Credit Ratings. Credit ratings issued by credit-rating agencies are designed to evaluate the safety of principal and interest payments of rated securities. They do not, however, evaluate the market value risk of lower-quality securities and, therefore, may not fully reflect the risks of an investment. In addition, credit rating agencies may or may not make timely changes in a rating to reflect changes in the economy or in the condition of the issuer that affect the market value of the security. With regard to an investment in below investment grade securities, the achievement of the Fund's investment objective may be more dependent on the Adviser's own credit analysis than is the case for higher rated securities. Although the Adviser considers security ratings when making investment decisions, it does not rely solely on the ratings assigned by the rating services. Rather, the Adviser performs research and independently assesses the value of particular securities relative to the market. The Adviser's analysis may include consideration of the issuer's experience and managerial strength, changing financial condition, borrowing requirements or debt maturity schedules, and the issuer's responsiveness to changes in business conditions and interest rates. It also considers relative values based on anticipated cash flow, interest or dividend coverage, asset coverage and earnings prospects.

The Adviser buys and sells debt securities principally in response to its evaluation of an issuer's continuing ability to meet its obligations, the availability of better investment opportunities, and its assessment of changes in business conditions and interest rates.

Liquidity and Valuation. Below investment grade securities may lack an established retail secondary market, and to the extent a secondary trading market does exist, it may be less liquid than the secondary market for higher rated securities. The lack of a liquid secondary market may negatively impact the Fund's ability to dispose of particular securities. The lack of a liquid secondary market for certain securities may also make it more difficult for the Fund to obtain accurate market quotations for purposes of valuing the Fund's portfolio. In addition, adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of below investment grade securities, especially in a thinly traded market.

Inflation-Linked Bonds. The Fund may, directly or indirectly, invest in inflation-linked bonds, which are issued by the U.S. government and foreign governments with a nominal return indexed to the inflation rate in prices. Governments that issue inflation-indexed bonds may use different conventions for purposes of structuring their bonds and different inflation factors, with the same underlying principal of linking real returns and inflation.

For purposes of explanation, a U.S. Treasury Inflation-Protected Securities ("U.S. TIPS") bond will be used as an example of how inflation-linked bonds work. Inflation-linked bonds, like nominal bonds, pay coupons on a principal amount. For U.S. TIPS, and most inflation-linked bonds, the value of the principal is adjusted for inflation. In the United States, the index used to measure inflation is the non-seasonally adjusted U.S. City Average All Items Consumer Price Index for All Urban Consumers ("CPI-U"). Interest payments are paid every six months, and are equal to a fixed percentage of the inflation-adjusted value of the principal. The final payment of principal of the security will not be less than the original par amount of the security at issuance.

The principal of the inflation-linked security is indexed to the non-seasonally adjusted CPI-U. To calculate the inflation-adjusted principal value for a particular valuation date, the value of the principal at issuance is multiplied by the index ratio applicable to that valuation date. The index ratio for any date is the ratio of the reference CPI applicable to such date, to the reference CPI applicable to the original issue date. Semi-annual coupon interest is determined by multiplying the inflation-adjusted principal amount by one-half of the stated rate of interest on each interest payment date.

Inflation-adjusted principal or the original par amount, whichever is larger, is paid on the maturity date as specified in the applicable offering announcement. If at maturity the inflation-adjusted principal is less than the original principal value of the security, an additional amount is paid at maturity so that the additional amount plus the inflation-adjusted principal equals the original principal amount. Some inflation-linked securities may be stripped into principal and interest components. In the case of a stripped security, the holder of the stripped principal component would receive this additional amount. The final interest payment, however, will be based on the final inflation-adjusted principal value, not the original par amount.

If the Fund invests in U.S. TIPS, it will be required to treat as original issue discount any increase in the principal amount of the securities that occurs during the course of its taxable year. If the Fund purchases such inflation-linked securities that are issued in stripped form ("OID Securities"), either as stripped bonds or coupons, it will be treated as if it had purchased a newly issued debt instrument having "original issue discount." The Fund holding an obligation with original issue discount is required to accrue as ordinary income a portion of such original issue discount even though it receives no corresponding interest payment in cash. The Fund may have to sell other investments to obtain cash needed to make income distributions, which may reduce the Fund's assets, increase its expense ratio and decrease its rate of return.

The higher yields and interest rates on OID Securities reflects the payment deferral and increased credit risk associated with such instruments and that such investment may represent a significantly higher

credit risk than coupon loans. Further, OID Securities may have unreliable valuations because their continuing accruals require continuing judgments about the collectability of the deferred payments and the value of any associated collateral.

Commodities Instruments. The Fund may obtain exposure to commodities indirectly by investing in ETFs that invest in securities of companies engaged in the production and distribution of commodities and commodity-related products, exchange-traded notes (“ETNs”) that are linked to the returns of one or more commodity indices that reflect the potential return on leveraged and unleveraged investments in futures contracts of physical commodities, plus interest that could be earned on cash collateral, and minus the issuer’s fee (see “Exchange-Traded Notes” below), and such other instruments as deemed appropriate from time to time. The Fund may be exposed to a wide variety of commodity sectors, including, without limitation, agriculture, livestock, base/industrial metals, oil, energy and precious metals.

Exposure to commodities may result in losses for the Fund. Commodity prices, and the value of stocks of companies exposed to commodities, can be extremely volatile and are affected by a wide range of factors, including market movements, supply and demand imbalances, inflationary trends or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. The energy sector can be significantly affected by changes in the prices and supplies of oil and other energy fuels, energy conservation, the success of exploration projects, and tax and other government regulations, policies of the Organization of Petroleum Exporting Countries (“OPEC”) and relationships among OPEC members and between OPEC and oil importing nations. The metals sector can be affected by sharp price volatility over short periods caused by global economic, financial and political factors, resource availability, government regulation, economic cycles, changes in inflation or expectations about inflation in various countries, interest rates, currency fluctuations, metal sales by governments, central banks or international agencies, investment speculation and fluctuations in industrial and commercial supply and demand. Increased demand for commodities by emerging market countries may result in shortages and cause prices to rise, potentially resulting in speculative investments in commodities. In addition, with respect to the Fund’s exposure to commodities indirectly through companies in the commodities sector and ETNs, there are additional risks to the Fund as there is no guarantee that those companies’ investments and business strategies relating to commodities will be successful, and the value of the Fund’s investments in ETFs or other instruments exposed to companies in the commodities sector, and the value of the companies themselves, may fluctuate more than the value of the relevant underlying commodity or commodities or commodity index.

See “ETNs” below for specific risks relating to the Fund’s investments in ETNs that are linked to the returns of one or more commodity indices.

Commodity-Linked Notes. Commodity-linked notes and other related instruments purchased, directly or indirectly, by the Fund are generally privately negotiated debt obligations where the principal paid to the Fund by the counterparty at maturity or redemption is determined by reference to the performance of a specific reference commodity or group of commodities or commodity index. The principal amount payable upon maturity or redemption may fluctuate, depending upon changes in the value of the reference commodity or index. The terms of a commodity-linked note may provide that, in certain circumstances where the value of the reference commodity or index substantially declines, no principal is due to the buyer of the commodity-linked note at maturity and, therefore, may result in a total loss of invested capital by the Fund. The principal payments that may be made on a commodity-linked note may vary widely, depending on a variety of factors, including the volatility of the reference commodity or index. Commodity-linked notes may be positively or negatively indexed, so the appreciation of the reference commodity may produce an increase or a decrease in the value of the principal at maturity. The rate of return on commodity-linked notes may be determined by applying a multiplier to the performance or

differential performance of reference commodities or indices. Application of a multiplier involves leverage that will serve to magnify the potential for gain and the risk of loss. The purchase of commodity-linked notes exposes the Fund to the credit risk of the issuer of the commodity-linked product. Commodity-linked notes may also be more volatile, less liquid, and more difficult to price accurately than less complex securities and instruments or more traditional debt securities.

Real Estate Investment Trusts (“REITs”). The Fund may invest, directly or indirectly, in REITs, which are companies that invest in real estate, mortgages and construction loans. REITs normally do not pay federal income tax but distribute their income to their shareholders who become liable for the tax. The Fund may invest, directly or indirectly, in any category of REIT and may purchase common stocks, preferred stocks or bonds issued by REITs. There are risks in investing, directly or indirectly, in REITs. The property owned by a REIT could decrease in value and loans held by a REIT could decline in value or become worthless.

Investment Companies. The Fund may, from time to time, invest in securities of other investment companies, including, without limitation, money market funds and exchange traded funds (“ETFs”). Investments in other investment companies subject the Fund to additional operating and management fees and expenses. For example, the Fund’s investors will indirectly bear fees and expenses charged by underlying investment companies in which the Fund invests, in addition to the Fund’s direct fees and expenses.

Generally, under Section 12(d)(1) of the Investment Company Act of 1940, as amended (the “1940 Act”), a fund may not acquire shares of another investment company if, immediately after such acquisition, (i) a fund would hold more than 3% of the other investment company’s total outstanding shares, (ii) a fund’s investment in securities of the other investment company would be more than 5% of the value of the total assets of the fund, or (iii) more than 10% of a fund’s total assets would be invested in investment companies. Under certain statutory and regulatory exemptions, a fund may invest in registered and unregistered money market funds in excess of these limitations. The Fund may rely upon any applicable statutory or regulatory exemptions in investing in other investment companies. The Fund generally expects to rely on Rule 12d1-1 under the 1940 Act when purchasing shares of a money market fund. Under Rule 12d1-1, the Funds may generally invest without limitation in money market funds as long as the Fund pay no sales charge (“sales charge”), as defined in rule 2830(b)(8) of the Conduct Rules of the Financial Industry Regulatory Authority (“FINRA”), or service fee, as defined in rule 2830(b)(9) of the Conduct Rules of FINRA, charged in connection with the purchase, sale, or redemption of securities issued by the money market fund (“service fee”); or the Adviser waives its Management Fee in an amount necessary to offset any sales charge or service fee. The Fund generally expects to rely on Section 12(d)(1)(F) of the 1940 Act when purchasing shares of other investment companies that are not money market funds. Under Section 12(d)(1)(F), the Fund may generally acquire shares of another investment company unless, immediately after such acquisition, the Fund and its affiliated persons would hold more than 3% of the investment company’s total outstanding stock (the “3% Limitation”). To the extent the 3% Limitation applies to an investment the Fund wishes to make, the Fund may be prevented from allocating their investments in the manner that the Adviser considers optimal. Also, under the 1940 Act, to the extent that the Fund relies upon Section 12(d)(1)(F) in purchasing securities issued by another investment company, the Fund must either seek instructions from its shareholders with regard to the voting of all proxies with respect to its investment in such securities and vote such proxies only in accordance with the instructions, or vote the shares held by each in the same proportion as the vote of all other holders of the securities. In the event that there is a vote of investment company shares held by the Fund in reliance on Section 12(d)(1)(F), the Fund intends to vote such shares in the same proportion as the vote of all other holders of such securities. In addition, the Fund may also invest in excess of the Section 12(d)(1) limits in accordance with Rule 12d1-4 under the 1940 Act (“Rule 12d1-4”), subject to the limitations and conditions set forth therein, including that an acquiring fund relying on Rule 12d1-4 must enter into a fund of funds investment agreement with the acquired fund and may be

subject to certain voting requirements depending on the acquiring fund's ownership in the acquired fund. All these restrictions and conditions may limit the Fund's ability to invest in other investment companies to the extent desired.

ETFs and Other Similar Instruments. Shares of ETFs and other similar instruments may be purchased by the Fund. An ETF is typically an investment company registered under the 1940 Act that holds a portfolio of securities designed to track the performance of a particular index or market sector. Alternatively, ETFs may be actively managed pursuant to a particular investment strategy, similar to other non-index based investment companies. ETFs are traded on a securities exchange based on their market value. In addition, ETFs sell and redeem their shares at NAV in large blocks (typically 50,000 of its shares) called "creation units." Shares representing fractional interests in these creation units are also listed for trading on national securities exchanges and can be purchased and sold in the secondary market like ordinary stocks in lots of any size at any time during the trading day.

Instruments the Fund may purchase that are similar to ETFs represent beneficial ownership interests in specific "baskets" of securities of companies within a particular industry sector or group. These securities may also be listed on national securities exchanges and purchased and sold in the secondary market, but unlike ETFs, are not investment companies under the 1940 Act. Such securities may also be exchange traded, but because they are not registered as investment companies, they are not subject to the percentage investment limitations imposed by the 1940 Act.

An investment in an ETF generally presents the same primary risks as an investment in a conventional registered investment company (i.e., one that is not exchange traded), including the risk that the general level of securities prices, or that the prices of securities within a particular sector, may increase or decline, thereby affecting the value of the shares of an ETF. In addition, ETFs are subject to the following risks that do not apply to conventional registered investment companies: (1) the market price of the ETF's shares may trade at a discount to the ETF's NAV; (2) an active trading market for an ETF's shares may not develop or be maintained; (3) trading of an ETF's shares may be halted if the listing exchange deems such action appropriate; (4) ETF shares may be delisted from the exchange on which they trade; and (5) activation of "circuit breakers" by the exchange (which are tied to large decreases in stock prices) may halt trading of the ETF's shares temporarily. ETFs are also subject to the risks of the underlying securities or sectors the ETF is designed to track.

Because ETFs and pools that issue similar instruments bear various fees and expenses, the Fund will pay a proportionate share of these expenses, as well as transaction costs, such as brokerage commissions. As with traditional registered investment companies, ETFs charge asset-based fees, although these fees tend to be relatively low as compared to other types of investment companies. ETFs do not charge initial sales loads or redemption fees and investors pay only customary brokerage fees to buy and sell ETF shares.

While the creation and redemption of creation units helps an ETF maintain a market value close to NAV, the market value of an ETF's shares may differ from its NAV. This difference in price may be due to the fact that the supply and demand in the market for ETF shares at any point in time is not always identical to the supply and demand in the market for the ETF's underlying basket of securities. Accordingly, there may be times when an ETF trades at a premium (creating the risk that the Fund pays more than NAV for an ETF when making a purchase) or discount (creating the risks that the Fund's NAV is reduced for undervalued ETFs it holds, and that the Fund receives less than NAV when selling an ETF).

As discussed above under the section entitled "Investment Companies," there are certain limitations on the Fund's ability to acquire shares of other investment companies, including ETFs; however,

the Fund expects to rely upon applicable statutory or regulatory exemptions to these limitations in investing in ETFs to the extent necessary.

Leveraged and Inverse ETF Risk. The Fund may invest in leveraged and inverse ETFs. Leveraged and inverse ETFs involve additional risks and considerations not present in traditional ETFs. Typically, shares of an index-based ETF are expected to increase in value as the value of the underlying benchmark increases. However, in the case of inverse ETFs (also called “short ETFs” or “bear ETFs”), shares are expected to increase in value as the value of the underlying benchmark decreases, similar to holding short positions in the underlying benchmark. Leveraged ETFs seek to deliver multiples (e.g., 2X or 3X) of the performance of the underlying benchmark, typically by using derivatives in an effort to amplify returns (or decline, in the case of inverse ETFs) of the underlying benchmark. While leveraged ETFs may offer the potential for greater return, the potential for loss and the speed at which losses can be realized also are greater.

Leveraged and inverse ETFs “reset” over short periods of time, meaning they are designed to deliver their stated returns only for the length of their reset periods (typically daily or monthly), and are not designed to deliver their returns intraday or over periods longer than the stated reset period. Because of the structure of these products, their rebalancing methodologies and the math of compounding, holding the ETFs beyond the reset period can lead to results very different from a simple doubling, tripling, or inverse of the benchmark's average return over the same period of time. This difference in results can be magnified in volatile markets. Further, leveraged and inverse ETFs may have lower trading volumes or may be less tax efficient than traditional ETFs and may be subject to additional regulation. To the extent that leveraged or inverse ETFs invest in derivatives, investments in such ETFs will be subject to the risks of investments in derivatives. For these reasons, leveraged and inverse ETFs are typically considered to be riskier investments than traditional ETFs.

ETNs. The Fund may invest in ETNs. ETNs are generally notes representing debt of the issuer, usually a financial institution. ETNs combine both aspects of bonds and ETFs. An ETN's returns are based on the performance of one or more underlying assets, reference rates or indexes, minus fees and expenses.

Similar to ETFs, ETNs are listed on an exchange and traded in the secondary market. However, unlike an ETF, an ETN can be held until the ETN's maturity, at which time the issuer will pay a return linked to the performance of the specific asset, index or rate (“reference instrument”) to which the ETN is linked minus certain fees. Unlike regular bonds, ETNs do not make periodic interest payments, and principal is not protected.

The value of an ETN may be influenced by, among other things, time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying markets, changes in the applicable interest rates, the performance of the reference instrument, changes in the issuer's credit rating and economic, legal, political or geographic events that affect the reference instrument. An ETN that is tied to a reference instrument may not replicate the performance of the reference instrument. ETNs also incur certain expenses not incurred by their applicable reference instrument. Some ETNs that use leverage can, at times, be relatively illiquid and, thus, they may be difficult to purchase or sell at a fair price. Leveraged ETNs are subject to the same risk as other instruments that use leverage in any form. While leverage allows for greater potential return, the potential for loss is also greater. Finally, additional losses may be incurred if the investment loses value because, in addition to the money lost on the investment, the loan still needs to be repaid.

Because the return on the ETN is dependent on the issuer's ability or willingness to meet its obligations, the value of the ETN may change due to a change in the issuer's credit rating, despite no change in the underlying reference instrument. The market value of ETN shares may differ from the value of the

reference instrument. This difference in price may be due to the fact that the supply and demand in the market for ETN shares at any point in time is not always identical to the supply and demand in the market for the assets underlying the reference instrument that the ETN seeks to track.

There may be restrictions on the Fund's right to redeem its investment in an ETN, which are generally meant to be held until maturity. The Fund's decision to sell its ETN holdings may be limited by the availability of a secondary market. An investor in an ETN could lose some or all of the amount invested.

Forwards, Futures, Swaps and Options. As described below, the Fund may purchase and sell in the U.S. or abroad futures contracts, forward contracts, swaps and put and call options on securities, futures, securities indices, swaps and currencies. In the future, the Fund may employ instruments and strategies that are not presently contemplated, but which may be subsequently developed, to the extent such investment methods are consistent with such Fund's investment objectives, and are legally permissible. There can be no assurance that an instrument, if employed, will be successful.

The Fund may buy and sell these investments for a number of purposes, including hedging, investment or speculative purposes. For example, it may do so to try to manage its exposure to the possibility that the prices of its portfolio securities may decline, or to establish a position in the securities market as a substitute for purchasing individual securities. Some of these strategies, such as selling futures, buying puts and writing covered calls, may be used to hedge the Fund's portfolio against price fluctuations. Other hedging strategies, such as buying futures and call options, tend to increase the Fund's exposure to the securities market.

Special Risk Factors Regarding Forwards, Futures, Swaps and Options. Transactions in derivative instruments (e.g., futures, options, forwards, and swaps) involve a risk of loss or depreciation due to: unanticipated adverse changes in securities prices, interest rates, indices, the other financial instruments' prices or currency exchange rates; the inability to close out a position; default by the counterparty; imperfect correlation between a position and the desired hedge (if the derivative instrument is being used for hedging purposes); tax constraints on closing out positions; and portfolio management constraints on securities subject to such transactions. The loss on derivative instruments (other than purchased options) may substantially exceed the amount invested in these instruments. In addition, the entire premium paid for purchased options may be lost before they can be profitably exercised. Transaction costs are incurred in opening and closing positions.

The Fund's use of swaps, futures contracts, forward contracts and certain other derivative instruments will have the economic effect of financial leverage. Financial leverage magnifies exposure to the swings in prices of an asset underlying a derivative instrument and results in increased volatility, which means the Fund will have the potential for greater gains, as well as the potential for greater losses, than if the Fund does not use derivative instruments that have a leveraging effect. Leveraging tends to magnify, sometimes significantly, the effect of any increase or decrease in the Fund's exposure to an asset and may cause the Fund's NAV to be volatile. For example, if the Adviser seeks to gain enhanced exposure to a specific asset through a derivative instrument providing leveraged exposure to the asset and that derivative instrument increases in value, the gain to the Fund will be magnified; however, if that investment decreases in value, the loss to the Fund will be magnified. A decline in the Fund's assets due to losses magnified by the derivative instruments providing leveraged exposure may require the Fund to liquidate portfolio positions to satisfy its obligations, to meet redemption requests or to meet asset segregation requirements when it may not be advantageous to do so. There is no assurance that the Fund's use of derivative instruments providing enhanced exposure will enable the Fund to achieve its investment objective.

The Fund's success in using derivative instruments to hedge portfolio assets depends on the degree of price correlation between the derivative instruments and the hedged asset. Imperfect correlation may be

caused by several factors, including temporary price disparities among the trading markets for the derivative instrument, the assets underlying the derivative instrument and the Fund's assets.

OTC derivative instruments involve an increased risk that the issuer or counterparty will fail to perform its contractual obligations. Some derivative instruments are not readily marketable or may become illiquid under adverse market conditions. In addition, during periods of market volatility, a commodity exchange may suspend or limit trading in an exchange-traded derivative instrument, which may make the contract temporarily illiquid and difficult to price. Commodity exchanges may also establish daily limits on the amount that the price of a futures contract or futures option can vary from the previous day's settlement price. Once the daily limit is reached, no trades may be made that day at a price beyond the limit. This may prevent the closing out of positions to limit losses. Certain purchased OTC options, and assets used as cover for written OTC options, may be considered illiquid. The ability to terminate OTC derivative instruments may depend on the cooperation of the counterparties to such contracts. For thinly traded derivative instruments, the only source of price quotations may be the selling dealer or counterparty. The use of derivatives is a highly specialized activity that involves skills different from conducting ordinary portfolio securities transactions. There can be no assurance that the Adviser's use of derivative instruments will be advantageous to the Fund.

Regulatory Matters Regarding Forwards, Futures, Swaps and Options. The Fund will be required to comply with and adhere to all applicable limitations on the manner and extent to which it effects transactions in derivative instruments (including futures and options on such futures) imposed by the provisions of the 1940 Act applicable to the issuance of senior securities. Additionally, the Trust, on behalf of the Fund, has claimed an exclusion from the definition of the term "commodity pool operator" pursuant to Rule 4.5 under the Commodity Exchange Act, as amended (the "CEA"). Therefore, the Fund is not subject to regulation or registration as a commodity pool operator under the CEA. By claiming the exclusion, the Fund is limited in its ability to use certain derivatives, such as futures, certain options, and swaps, without the Fund becoming subject to CFTC regulation. On an annual basis, the Fund is required to reaffirm its eligibility to continue to claim the exclusion. If the Fund's use of derivatives would prevent it from claiming the exclusion (or any other exclusion or exemption available under CFTC regulations), then the Adviser may be subject to regulation as a commodity pool operator or commodity trading advisor with respect to the Fund, and the Fund may become subject to regulation by the CFTC. The Fund may incur additional expenses in complying with the CFTC's recordkeeping, reporting and disclosure requirements.

Legal and regulatory changes, and additional legal and regulatory changes in the future, may substantially affect OTC derivatives markets and such changes may impact the Fund's use of such instruments to the extent such instruments are used by the Fund. The Dodd-Frank Act and related regulatory developments provide for new regulation of the derivatives market, including clearing, margin, reporting and registration requirements. These regulations could, among other things, restrict the Fund's ability to engage in derivatives transactions or increase the costs of derivatives transactions (for example, by increasing margin or capital requirements), and the Fund's ability to pursue its investment strategy could be adversely affected.

Transactions in futures and options by the Fund are subject to limitations established by futures and option exchanges governing the maximum number of futures and options that may be written or held by a single investor or group of investors acting in concert, regardless of whether the futures or options were written or purchased on the same or different exchanges or are held in one or more accounts or through one or more different exchanges or through one or more brokers. Thus the number of futures or options which the Fund may write or hold may be affected by futures or options written or held by other entities, including other investment companies advised by the Adviser. An exchange may order the liquidation of positions found to be in violation of those limits and may impose certain other sanctions.

Forward Contracts. A forward contract is an obligation to purchase or sell a specific security, currency or other instrument for an agreed price at a future date that is individually negotiated and privately traded by traders and their customers. In contrast to contracts traded on an exchange (such as futures contracts), forward contracts are not guaranteed by any exchange or clearinghouse and are subject to the creditworthiness of the counterparty of the trade. Forward contracts are highly leveraged and highly volatile, and a relatively small price movement in a forward contract may result in substantial losses to the Fund. To the extent the Fund engages in forward contracts to generate total return, the Fund will be subject to these risks.

Forward contracts are not always standardized and are frequently the subject of individual negotiation between the parties involved. By contrast, futures contracts are generally standardized and futures exchanges have central clearinghouses which keep track of all positions.

Because there is no clearinghouse system applicable to forward contracts, there is no direct means of offsetting a forward contract by purchase of an offsetting position on the same exchange as one can with respect to a futures contract. Absent contractual termination rights, the Fund may not be able to terminate a forward contract at a price and time that it desires. In such event, the Fund will remain subject to counterparty risk with respect to the forward contract, even if the Fund enters into an offsetting forward contract with the same, or a different, counterparty. If a counterparty defaults, the Fund may lose money on the transaction.

Depending on the asset underlying the forward contract, forward transactions can be influenced by, among other things, changing supply and demand relationships, government commercial and trade programs and policies, national and international political and economic events, weather and climate conditions, insects and plant disease, purchases and sales by foreign countries and changing interest rates.

Futures Contracts. U.S. futures contracts are traded on organized exchanges regulated by the CFTC. Transactions on such exchanges are cleared through a clearing corporation, which guarantees the performance of the parties to each contract. The Fund may also invest in non-U.S. futures contracts.

The Fund will cover its obligation under the futures transactions in which it participates by either (i) holding offsetting positions that appropriately equal the daily market value of the Fund's position in the futures contract (less the initial margin and any variation margins deposited with its futures commission merchant ("FCM")) or (ii) accruing such amounts on a daily basis and maintaining Segregated Assets to cover the futures contract. With respect to a futures contract that is not contractually required to "cash settle" the Fund will cover its open position by maintaining Segregated Assets equal to the contract's full, notional value. However, the Fund may net non-cash settled futures contracts if the futures have the same expiration date and underlying instruments. With respect to a futures contract that is contractually required to "cash settle", pursuant to the terms of the futures contract itself or through an agreement with the FCM, the Fund is permitted to maintain Segregated Assets in an amount equal to the Fund's daily mark-to-market (net) obligation (that is, the Fund's daily net liability if any) rather than the notional value (in other words the initial margin plus any variation margin (unrealized loss) due based on the previous day's trading). The total cover required for all cash-settled futures contracts may be determined by netting the aggregate obligations of such contracts. By setting aside assets equal to only its net obligation under cash-settled futures contracts the Fund will have the ability to employ leverage to a greater extent than if the Fund were required to segregate assets equal to the full notional value of such contracts. The value of any liquid assets held as initial or variation margin with the Fund's FCM for a futures contract may be deemed physically segregated or earmarked for "cover" purposes so long as such assets are held in compliance with Rule 17f-6 under the 1940 Act.

There are several risks in connection with the use of futures by the Fund. In the event futures are used by the Fund for hedging purposes, one risk arises because of the imperfect correlation between movements in the price of futures and movements in the price of the instruments which are the subject of the hedge. The price of futures may move more than or less than the price of the instruments being hedged. If the price of futures moves less than the price of the instruments which are the subject of the hedge, the hedge will not be fully effective, but, if the price of the instruments being hedged has moved in an unfavorable direction, the Fund would be in a better position than if it had not hedged at all. If the price of the instruments being hedged has moved in a favorable direction, this advantage will be partially offset by the loss on the futures. If the price of the futures moves more than the price of the hedged instruments, the Fund involved will experience either a loss or gain on the futures which will not be completely offset by movements in the price of the instruments which are the subject of the hedge.

To compensate for the imperfect correlation of movements in the price of instruments being hedged and movements in the price of futures contracts, the Fund may buy or sell futures contracts in a greater dollar amount than the dollar amount of instruments being hedged if the volatility over a particular time period of the prices of such instruments has been greater than the volatility over such time period of the futures, or if otherwise deemed to be appropriate by the Adviser. Conversely, the Fund may buy or sell fewer futures contracts if the volatility over a particular time period of the prices of the instruments being hedged is less than the volatility over such time period of the futures contract being used, or if otherwise deemed to be appropriate by the Adviser. It is also possible that, when the Fund sells futures to hedge its portfolio against a decline in the market, the market may advance and the value of the futures instruments held in the Fund may decline.

Where futures are purchased to hedge against a possible increase in the price of securities before the Fund is able to invest its cash (or cash equivalents) in an orderly fashion, it is possible that the market may decline instead; if the Fund then concludes not to invest its cash at that time because of concern as to possible further market decline or for other reasons, the Fund will realize a loss on the futures contract that is not offset by a reduction in the price of the securities that were to be purchased.

Successful use of futures to hedge portfolio securities protects against adverse market movements but also reduces potential gain. For example, if the Fund has hedged against the possibility of a decline in the market adversely affecting securities held by it and securities prices increase instead, the Fund will lose part or all of the benefit to the increased value of its securities which it has hedged because it will have offsetting losses in its futures positions. In addition, in such situations, if the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements (as described below). Such sales of securities may be, but will not necessarily be, at increased prices which reflect the rising market. The Fund may have to sell securities at a time when it may be disadvantageous to do so.

The Fund may also use futures to attempt to gain exposure to a particular market, index, security, commodity or instrument or for speculative purposes to increase return. One or more markets, indices or instruments to which the Fund has exposure through futures may go down in value, possibly sharply and unpredictably. This means the Fund may lose money.

The price of futures may not correlate perfectly with movement in the cash market due to certain market distortions. Rather than meeting additional margin deposit requirements, investors may close futures contracts through offsetting transactions which could distort the normal relationship between the cash and futures markets. Further, with respect to financial futures contracts, the liquidity of the futures market depends on participants entering into offsetting transactions rather than making or taking delivery. To the extent participants decide to make or take delivery, liquidity in the futures market could be reduced, thus producing distortions. In addition, from the point of view of speculators, the deposit requirements in the futures market are less onerous than margin requirements in the securities market. Therefore, increased

participation by speculators in the futures market may also cause temporary price distortions. Due to the possibility of price distortion in the futures market, and because of the imperfect correlation between the movements in the cash market and movements in the price of futures, a correct forecast of general market trends or interest rate movements by the Adviser, as applicable, may still not result in a successful hedging transaction over a short time frame (in the event futures are used for hedging purposes).

Positions in futures may be closed out only on an exchange or board of trade which provides a secondary market for such futures. Although the Fund intends to purchase or sell futures only on exchanges or boards of trade where there appear to be active secondary markets, there is no assurance that a liquid secondary market on any exchange or board of trade will exist for any particular contract or at any particular time. When there is no liquid market, it may not be possible to close a futures investment position, and in the event of adverse price movements, the Fund would continue to be required to make daily cash payments of variation margin (as described below). In such circumstances, an increase in the price of the securities, if any, may partially or completely offset losses on the futures contract. However, as described above, there is no guarantee that the price of the securities will in fact correlate with the price movements in the futures contract and thus provide an offset on a futures contract.

Further, it should be noted that the liquidity of a secondary market in a futures contract may be adversely affected by “daily price fluctuation limits” established by commodities exchanges which limit the amount of fluctuation in a futures contract price during a single trading day. Once the daily limit has been reached in the contract, no trades may be entered into at a price beyond the limit, thus preventing the liquidation of open futures positions. The trading of futures contracts is also subject to the risk of trading halts, suspensions, exchange or clearing house equipment failures, government intervention, insolvency of a brokerage firm or clearing house or other disruptions of normal activity, which could at times make it difficult or impossible to liquidate existing positions or to recover equity.

Stock Index Futures. The Fund may invest in stock index futures. A stock index assigns relative values to the common stocks included in the applicable index and fluctuates with the changes in the market value of those stocks.

Stock index futures are contracts based on the future value of the basket of securities that comprise the underlying stock index. The contracts obligate the seller to deliver and the purchaser to take cash to settle the futures transaction or to enter into an obligation contract. No physical delivery of the securities underlying the index is made on settling the futures obligation. No monetary amount is paid or received by the Fund on the purchase or sale of a stock index future. At any time prior to the expiration of the future, the Fund may elect to close out its position by taking an opposite position, at which time a final determination of variation margin is made and additional cash is required to be paid by or released to the Fund. Any gain or loss is then realized by the Fund on the future for tax purposes. Although stock index futures by their terms call for settlement by the delivery of cash, in most cases the settlement obligation is fulfilled without such delivery by entering into an offsetting transaction. All futures transactions are effected through a clearing house associated with the exchange on which the contracts are traded.

Futures Contracts on Securities. The Fund may purchase and sell futures contracts on securities. A futures contract sale creates an obligation by the Fund, as seller, to deliver the specific type of financial instrument called for in the contract at a specific future time for a specified price. A futures contract purchase creates an obligation by the Fund, as purchaser, to take delivery of the specific type of financial instrument at a specific future time at a specific price. The specific securities delivered or taken, respectively, at settlement date, would not be determined until or near that date. The determination would be in accordance with the rules of the exchange on which the futures contract sale or purchase was made.

Although futures contracts on securities by their terms call for actual delivery or acceptance of securities, in most cases the contracts are closed out before the settlement date without making or taking delivery of securities. The Fund may close out a futures contract sale by entering into a futures contract purchase for the same aggregate amount of the specific type of financial instrument and the same delivery date. If the price of the sale exceeds the price of the offsetting purchase, the Fund is immediately paid the difference and thus realizes a gain. If the offsetting purchase price exceeds the sale price, the Fund pays the difference and realizes a loss. Similarly, the Fund may close out of a futures contract purchase by entering into a futures contract sale. If the offsetting sale price exceeds the purchase price, the Fund realizes a gain, and if the purchase price exceeds the offsetting sale price, the Fund realizes a loss. Accounting for futures contracts will be in accordance with generally accepted accounting principles.

Swap Agreements. The Fund may enter into swap agreements with respect to securities, futures, currencies, indices, commodities and other instruments. Swap agreements can be individually negotiated and structured to include exposure to a variety of different types of investments or market factors, including securities, futures, currencies, indices, commodities and other instruments. Depending on their structure, swap agreements may increase or decrease the Fund's exposure to long- or short-term interest rates (in the United States or abroad), foreign currency values, mortgage securities, corporate borrowing rates, or other factors such as security prices or inflation rates. Swap agreements can take many different forms and are known by a variety of names.

Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are calculated with respect to a "notional amount" (i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index). The "notional amount" of the swap agreement is only a fictive basis on which to calculate the obligations that the parties to a swap agreement have agreed to exchange.

Some swap agreements that may be entered into by the Fund may calculate the obligations of the parties to the agreements on a "net" basis. Consequently, the Fund's obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The Fund's obligations under a swap agreement will be accrued daily (offset against any amounts owing to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by the maintenance of liquid assets in accordance with SEC staff positions on the subject.

Forms of swap agreements also include cap, floor and collar agreements. In a typical cap or floor agreement, one party agrees to make payments only under specified circumstances, usually in return for payment of a fee by the other party. For example, the buyer of an interest rate cap obtains the right to receive payments to the extent that a specified interest rate exceeds an agreed-upon level, while the seller of an interest rate floor is obligated to make payments to the extent that a specified interest rate falls below an agreed-upon level. An interest rate collar combines elements of buying a cap and selling a floor.

Swap agreements will tend to shift the Fund's investment exposure from one type of investment to another. For example, if the Fund agreed to pay fixed rates in exchange for floating rates while holding fixed-rate bonds, the swap would tend to decrease the Fund's exposure to long-term interest rates. Caps and floors have an effect similar to buying or writing options. Depending on how they are used, swap agreements may increase or decrease the overall volatility of the Fund's investments and its share price and yield. The most significant factor in the performance of swap agreements is the change in the specific

interest rate, currency, or other factors that determine the amounts of payments due to and from the Fund. If a swap agreement calls for payments by the Fund, whether in respect of periodic payments or margin, the Fund must be prepared to make such payments when due.

The Fund's use of swap agreements may not be successful in furthering its investment objective as the Adviser may not accurately predict whether certain types of investments are likely to produce greater returns than other investments. Because they are two party contracts and because they may have terms of greater than seven days, swap agreements may be considered to be illiquid. If such instruments are determined to be illiquid, then the Fund will limit its investment in these instruments subject to its limitation on investments in illiquid securities. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. Certain restrictions imposed on the Fund by the Internal Revenue Code of 1986, as amended (the "Code") may limit the Fund's ability to use swap agreements. The Fund may be able to eliminate its exposure under a swap agreement either by assignment or other disposition, or by entering into an offsetting swap agreement with the same party or a similarly creditworthy party. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements.

The Dodd-Frank Act and related regulatory developments requires the clearing and exchange-trading of certain standardized OTC derivative instruments the CFTC and the SEC have defined as "swaps." Mandatory exchange trading and clearing is occurring on a phased-in basis based on the type of market participant involved and the CFTC's approval of the contracts for central clearing. While central clearing and exchange trading are intended to reduce counterparty credit and liquidity risk, they do not make a swap transaction risk-free. The Adviser will continue to monitor developments in this area, particularly to the extent regulatory changes affect the Fund's ability to enter into swap agreements.

Credit Default Swap Agreement ("CDS") and Credit Default Index Swap Agreement Risk ("CDX"). The Fund may enter into credit default swap agreements, credit default index swap agreements and similar agreements as a "buyer" or as a "seller" of credit protection. The credit default swap agreement or similar instruments may have as reference obligations one or more securities that are not then held by the Fund. The protection "buyer" in a credit default swap agreement is generally obligated to pay the protection "seller" a periodic stream of payments over the term of the agreement, provided generally that no credit event on a reference obligation has occurred. In addition, at the inception of the agreement, the protection "buyer" may receive or be obligated to pay an additional up-front amount depending on the current market value of the contract. With respect to credit default swap agreements that are contractually required to cash settle, the Fund sets aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations under the contracts. For credit default swap agreements that are contractually required to physically settle, the Fund sets aside the full notional value of such contracts. If a credit event occurs, an auction process is used to determine the "recovery value" of the contract. The seller then must pay the buyer the "par value" (full notional value) of the swap contract minus the "recovery value" as determined by the auction process. The Fund may be either the buyer or seller in the transaction. If the Fund is a buyer and no credit event occurs, the Fund's net cash flows over the life of the contract will be the initial up-front amount paid or received minus the sum of the periodic payments made over the life of the contract. However, if a credit event occurs, the Fund may elect to receive a cash amount equal to the "par value" (full notional value) of the swap contract minus the "recovery value" as determined by the auction process. As a seller of protection, the Fund generally receives a fixed rate of income throughout the term of the swap provided that there is no credit event. In addition, at the inception of the agreement, the Fund may receive or be obligated to pay an additional up-front amount depending on the current market value of the contract. If a credit event occurs, the Fund will be generally obligated to pay the buyer the "par value" (full notional value) of the swap contract minus the "recovery value" as determined by the auction process. Credit default swaps could result in losses if the Adviser does not correctly evaluate the creditworthiness

of the underlying instrument on which the credit default swap is based. Additionally, if the Fund is a seller of a credit default swap and a credit event occurs, the Fund could suffer significant losses.

Equity, Currency, Commodity and Futures Swaps. The Fund may enter into swaps with respect to a security, currency, commodity or futures contract (each, an “asset”); basket of assets; asset index; or index component (each, a “reference asset”). An equity, currency, commodity or futures swap is a two-party contract that generally obligates one party to pay the positive return and the other party to pay the negative return on a specified reference asset during the period of the swap. The payments based on the reference asset may be adjusted for transaction costs, interest payments, the amount of dividends paid on the referenced asset or other economic factors.

Equity, currency, commodity or futures swap contracts may be structured in different ways. For example, with respect to an equity swap, when the Fund takes a long position, the counterparty may agree to pay the Fund the amount, if any, by which the notional amount of the equity swap would have increased in value had it been invested in a particular stock (or group of stocks), plus the dividends that would have been received on the stock. In these cases, the Fund may agree to pay to the counterparty interest on the notional amount of the equity swap plus the amount, if any, by which that notional amount would have decreased in value had it been invested in such stock.

Therefore, in this case the return to the Fund on the equity swap should be the gain or loss on the notional amount plus dividends on the stock less the interest paid by the Fund on the notional amount. In other cases, when the Fund takes a short position, a counterparty may agree to pay the Fund the amount, if any, by which the notional amount of the equity swap would have decreased in value had the Fund sold a particular stock (or group of stocks) short, less the dividend expense that the Fund would have paid on the stock, as adjusted for interest payments or other economic factors. In these situations, the Fund may be obligated to pay the amount, if any, by which the notional amount of the swap would have increased in value had it been invested in such stock.

Equity, currency, commodity or futures swaps normally do not involve the delivery of securities or other underlying assets. Accordingly, the risk of loss with respect to these swaps is normally limited to the net amount of payments that the Fund is contractually obligated to make. If the other party to the swap defaults, the Fund’s risk of loss consists of the net amount of payments that such Fund is contractually entitled to receive, if any. Inasmuch as these transactions are offset by segregated cash or liquid assets to cover each of the Fund’s current obligations (or are otherwise covered as permitted by applicable law), the Fund and the Adviser believe that these transactions do not constitute senior securities under the 1940 Act.

Equity, currency, commodity or futures swaps are derivatives and their value can be very volatile. To the extent that the Adviser does not accurately analyze and predict future market trends, the values of assets or economic factors, the Fund may suffer a loss, which may be substantial. The swap markets in which many types of swap transactions are traded have grown substantially in recent years, with a large number of banks and investment banking firms acting both as principals and as agents. As a result, the markets for certain types of swaps have become relatively liquid.

Total Return and Interest Rate Swaps. In a total return swap, the buyer receives a periodic return equal to the total return of a specified security, securities or index, for a specified period of time. In return, the buyer pays the counterparty a variable stream of payments, typically based upon short term interest rates, possibly plus or minus an agreed upon spread.

Interest rate swaps are financial instruments that involve the exchange of one type of interest rate for another type of interest rate cash flow on specified dates in the future. Some of the different types of interest rate swaps are “fixed-for floating rate swaps,” “termed basis swaps” and “index amortizing swaps.”

Fixed-for floating rate swaps involve the exchange of fixed interest rate cash flows for floating rate cash flows. Termed basis swaps entail cash flows to both parties based on floating interest rates, where the interest rate indices are different. Index amortizing swaps are typically fixed-for floating swaps where the notional amount changes if certain conditions are met. Like a traditional investment in a debt security, the Fund could lose money by investing in an interest rate swap if interest rates change adversely. For example, if the Fund enters into a swap where it agrees to exchange a floating rate of interest for a fixed rate of interest, the Fund may have to pay more money than it receives. Similarly, if the Fund enters into a swap where it agrees to exchange a fixed rate of interest for a floating rate of interest, the Fund may receive less money than it has agreed to pay.

Interest rate and total return swaps entered into in which payments are not netted may entail greater risk than a swap entered into a net basis. If there is a default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction.

Combined Transactions. The Fund may enter into multiple transactions, including multiple options transactions, multiple futures transactions, multiple currency transactions including forward currency contracts, multiple interest rate transactions and multiple swap transactions, and any combination of options, futures, currency, interest rate, and swap transactions (“component transactions”), instead of a single transaction, as part of a single or combined strategy when, in the opinion of the Adviser, it is in the best interests of the Fund to do so. A combined transaction will usually contain elements of risk that are present in each of its component transactions. Although combined transactions are normally entered into based on the Adviser’s judgment that the combined strategies will reduce risk or otherwise more effectively achieve the desired portfolio management goal, it is possible that the combination will instead increase such risks or hinder achievement of the portfolio management objective.

Leverage Risk. Futures contracts, forward contracts, swaps and certain other derivatives provide the economic effect of financial leverage by creating additional investment exposure, as well as the potential for greater loss. If the Fund uses leverage through activities such as borrowing, entering into short sales, purchasing securities on margin or on a “when-issued” basis or purchasing derivative instruments in an effort to increase its returns, the Fund has the risk of magnified capital losses that occur when losses affect an asset base, enlarged by borrowings or the creation of liabilities, that exceeds the net assets of the Fund. The NAV of the Fund when employing leverage will be more volatile and sensitive to market movements. Leverage may involve the creation of a liability that requires the Fund to pay interest.

Money Market Instruments. The Fund may invest in money market instruments. Money market instruments may include, without limitation, U.S. Government Obligations or certain types of corporate debt obligations (including those subject to repurchase agreements) as described herein, provided that they mature in thirteen months or less from the date of acquisition and are otherwise eligible for purchase by the Fund. Money market instruments also may include Banker’s Acceptances, Certificates of Deposit of domestic branches of U.S. banks, Commercial Paper, Variable Amount Demand Master Notes (“Master Notes”) and shares of money market investment companies. Banker’s Acceptances are time drafts drawn on and “accepted” by a bank, which are the customary means of effecting payment for merchandise sold in import-export transactions and are a source of financing used extensively in international trade. When a bank “accepts” such a time draft, it assumes liability for its payment. When the Fund acquires a Banker’s Acceptance, the bank which “accepted” the time draft is liable for payment of interest and principal when due. The Banker’s Acceptance, therefore, carries the full faith and credit of such bank. A Certificate of Deposit (“CD”) is an unsecured interest-bearing debt obligation of a bank. CDs acquired by the Fund would generally be in amounts of \$100,000 or more. **Commercial Paper** is an unsecured, short term debt obligation of a bank, corporation or other borrower. Commercial Paper maturity generally ranges from two to 270 days and is usually sold on a discounted basis rather than as an interest-bearing instrument. The Fund will invest in Commercial Paper only if it is rated in the highest rating category by any NRSRO or, if not

rated, if the issuer has an outstanding unsecured debt issue rated in the three highest categories by any NRSRO or, if not so rated, is of equivalent quality in the Adviser's assessment. Commercial Paper may include Master Notes of the same quality. **Master Notes** are unsecured obligations which are redeemable upon demand of the holder and which permit the investment of fluctuating amounts at varying rates of interest. Master Notes are acquired by the Fund only through the Master Note program of the custodian, acting as administrator thereof. The Adviser will monitor, on a continuous basis, the earnings power, cash flow and other liquidity ratios of the issuer of a Master Note held by the Fund. The Fund may invest in shares of **money market investment companies** to the extent permitted by the 1940 Act.

Mortgage-Backed Securities. Mortgage-backed securities are interests in pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. Pools of mortgage loans are assembled as securities for sale to investors by private entities or various governmental and government-related entities. Yield characteristics of mortgage-backed securities differ from those of traditional debt securities in a variety of ways. The most significant differences of mortgage-backed securities are: 1) payments of interest and principal are more frequent (usually monthly) and 2) falling interest rates generally cause individual borrowers to pay off their mortgage earlier than expected, which results in prepayments of principal on the securities, thus forcing the purchaser to reinvest the money at a lower interest rate. In addition to risks associated with changes in interest rates, a variety of economic, geographic, social and other factors, such as the sale of the underlying property, refinancing or foreclosure, can cause investors to repay the loans underlying a mortgage-backed security sooner than expected. When prepayment occurs, a purchaser of mortgage-backed securities may have to reinvest its principal at a rate of interest that is lower than the rate on existing mortgage-backed securities.

Asset-Backed Securities. These securities are interests in pools of a broad range of assets other than mortgages, such as automobile loans, computer leases and credit card receivables. Like mortgage-backed securities, these securities are pass-through. In general, the collateral supporting these securities is of shorter maturity than mortgage loans and is less likely to experience substantial prepayments with interest rate fluctuations, but may still be subject to prepayment risk.

Asset-backed securities present certain risks that are not presented by mortgage-backed securities. Primarily, these securities may not have the benefit of any security interest in the related assets, which raises the possibility that recoveries on repossessed collateral may not be available to support payments on these securities. For example, credit card receivables are generally unsecured and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which allow debtors to reduce their balances by offsetting certain amounts owed on the credit cards. Most issuers of asset-backed securities backed by automobile receivables permit the servicers of such receivables to retain possession of the underlying obligations. If the servicer were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the related asset-backed securities. Due to the quantity of vehicles involved and requirements under state laws, asset-backed securities backed by automobile receivables may not have a proper security interest in all of the obligations backing such receivables.

To lessen the effect of failures by obligors on underlying assets to make payments, the entity administering the pool of assets may agree to ensure the receipt of payments on the underlying pool occurs in a timely fashion ("liquidity protection"). In addition, asset-backed securities may obtain insurance, such as guarantees, policies or letters of credit obtained by the issuer or sponsor from third parties, for some or all of the assets in the pool ("credit support"). Delinquency or loss more than that anticipated or failure of the credit support could adversely affect the return on an investment in such a security.

Bank Loans. Bank loans typically are arranged through private negotiations between a borrower and several financial institutions or a group of lenders which are represented by one or more lenders acting as agent. The agent is often a commercial bank that originates the loan and invites other parties to join the lending syndicate. The agent will be primarily responsible for negotiating the loan agreement and will have responsibility for the documentation and ongoing administration of the loan on behalf of the lenders after completion of the loan transaction. The Fund can invest in a bank loan either as a direct lender or through an assignment or participation.

When the Fund acts as a direct lender, it will have a direct contractual relationship with the borrower and may participate in structuring the loan, may enforce compliance by the borrower with the terms of the loan agreement and may have voting, consent and set-off rights under the loan agreement.

Loan assignments are investments in all or a portion of certain bank loans purchased from the lenders or from other third parties. The purchaser of an assignment typically will acquire direct rights against the borrower under the loan. While the purchaser of an assignment typically succeeds to all the rights and obligations of the assigning lender under the loan agreement, because assignments are arranged through private negotiations between potential assignees and assignors, or other third parties whose interests are being assigned, the rights and obligations acquired by the Fund may differ from and be more limited than those held by the assigning lender.

A holder of a loan participation typically has only a contractual right with the seller of the participation and not with the borrower or any other entities interpositioned between the seller of the participation and the borrower. As such, the purchaser of a loan participation assumes the credit risk of the seller of the participation, and any intermediary entities between the seller and the borrower, in addition to the credit risk of the borrower. When the Fund holds a loan participation, it will have the right to receive payments of principal, interest and fees to which it may be entitled only from the seller of the participation and only upon receipt of the seller of such payments from the borrower or from any intermediary parties between the seller and the borrower. Additionally, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, will have no voting, consent or set-off rights under the loan agreement and may not directly benefit from the collateral supporting the loan although lenders that sell participations generally are required to distribute liquidation proceeds received by them pro rata among the holders of such participations. In the event of the bankruptcy or insolvency of the borrower, a loan participation may be subject to certain defenses that can be asserted by the borrower as a result of improper conduct by the seller or intermediary. If the borrower fails to pay principal and interest when due, the Fund may be subject to greater delays, expenses and risks than those that would have been involved if the Fund had purchased a direct obligation of such borrower.

Direct loans, assignments and loan participations may be considered liquid, as determined by the Adviser based on criteria approved by the Board.

The Fund may have difficulty disposing of bank loans because, in certain cases, the market for such instruments is not highly liquid. The lack of a highly liquid secondary market may have an adverse impact on the value of such instruments and on the Fund's ability to dispose of the bank loan in response to a specific economic event, such as deterioration in the creditworthiness of the borrower. Furthermore, transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period of time after the sale. As a result, those proceeds will not be available to make additional investments or to meet the Fund's redemption obligations. To the extent that extended settlement creates short-term liquidity needs, the Fund may satisfy these needs by holding additional cash or selling other investments (potentially at an inopportune time, which could result in losses to the Fund).

Bank loans may not be considered “securities,” and purchasers, such as the Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Municipal Securities. Municipal securities, including municipal bonds and municipal notes, consist of: (i) debt obligations issued by or on behalf of public authorities to obtain funds to be used for various public facilities, for refunding outstanding obligations, for general operating expenses and for lending such funds to other public institutions and facilities, and (ii) certain private activity and industrial development bonds issued by or on behalf of public authorities to obtain funds to provide for the construction, equipment, repair or improvement of privately operated facilities.

Municipal bonds are debt obligations issued to obtain funds for various public purposes. Municipal bonds include general obligation bonds, revenue or special obligation bonds, private activity and industrial development bonds, moral obligation bonds and participation interests in municipal bonds. General obligation bonds are backed by the taxing power of the issuing municipality. Revenue or special obligation bonds are backed by the revenues of a project or facility, such as tolls from a toll bridge. Private activity or industrial development bonds are issued by or on behalf of public authorities to raise money to finance various privately-owned or -operated facilities for business and manufacturing, housing, sports and pollution control. These bonds are also used to finance public facilities such as airports, mass transit systems, ports, parking or sewage or solid waste disposal facilities and certain other facilities. The payment of the principal and interest on such bonds is dependent solely on the ability of the facility’s user to meet its financial obligations and the pledge, if any, of real and personal property financed as security for such payment. Moral obligation bonds are normally issued by special purpose authorities. Moral obligation bonds are not backed by the full faith and credit of the issuing municipality, but are generally backed by the agreement of the issuing authority to request appropriations from the municipality’s legislative body. Certificates of participation represent an interest in an underlying obligation or commitment, such as an obligation issued in connection with a leasing arrangement.

Municipal notes consist of general obligation notes, tax anticipation notes (notes sold to finance working capital needs of the issuer in anticipation of receiving taxes on a future date), revenue anticipation notes (notes sold to provide needed cash prior to receipt of expected non-tax revenues from a specific source), bond anticipation notes, tax and revenue anticipation notes, certificates of indebtedness, demand notes and construction loan notes. The maturities of the instruments at the time of issue will generally range from three months to one year.

Senior Loan Risk. Investments in Senior Loans are subject to credit risk and general investment risk. Credit risk refers to the possibility that the borrower of a Senior Loan will be unable and/or unwilling to make timely interest payments and/or repay the principal on its obligation. Default in the payment of interest or principal on a Senior Loan will result in a reduction in the value of the Senior Loan and consequently a reduction in the value of the Fund's investments and a potential decrease in the NAV of the Fund. Senior Loans are also subject to the risk that the value of the collateral securing a Senior Loan may decline, be insufficient to meet the obligations of the borrower or be difficult to liquidate. In addition, the Fund's access to the collateral may be limited by bankruptcy or other insolvency laws. Further, loans held by the Fund may not be considered securities and, therefore, purchasers, such as the Fund, may not be entitled to rely on the strong anti-fraud protections of the federal securities laws. Some Senior Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the Senior Loans to presently existing or future indebtedness of the borrower or take other action detrimental to lenders, including the Fund, such as invalidation of Senior Loans or causing interest previously paid to be refunded to the borrower. Senior Loans are also subject to high yield securities risks and liquidity risks described above. In addition, bank loans may be subject to extended settlement periods, which may impair the Fund's ability to sell or realize the full value of its loans in the event of a need to liquidate such loans in a compressed period of time. Some of the loans in which the Fund may invest or obtain exposure to may

be “covenant-lite” loans. Covenant-lite loans may contain fewer or no maintenance covenants compared to other loans and may not include terms which allow the lender to monitor the performance of the borrower and declare a default if certain criteria are breached. The Fund may experience relatively greater realized or unrealized losses or delays in enforcing its rights on its holdings of covenant-lite loans than its holdings of loans with the usual covenants.

Repurchase Agreements. The Fund may invest, directly or indirectly, in repurchase agreements. A repurchase agreement transaction occurs when an investor (e.g., the Fund) purchases a security (normally a U.S. government security) from a counterparty with the understanding that the investor will later resell the security to the same counterparty (normally a member bank of the Federal Reserve or a registered government securities dealer). The Fund’s initial purchase is essentially a loan to the counterparty that is collateralized by the security (and/or securities substituted for them under the repurchase agreement). The Fund must return the security to the counterparty when the counterparty repurchases it at a later date and higher price. The repurchase price exceeds the purchase price by an amount that reflects an agreed upon market interest rate effective for the period of time during which the repurchase agreement is in effect. Delivery pursuant to the resale normally will occur within one to seven days of the purchase. Repurchase agreements are considered “loans” under the 1940 Act, collateralized by the underlying security. The Trust has implemented procedures to monitor on a continuous basis the value of the collateral serving as security for repurchase obligations. The Adviser will consider the creditworthiness of the counterparty. If the counterparty fails to pay the agreed upon resale price on the delivery date, the Fund will retain or attempt to dispose of the collateral. The Fund’s risk is that such default may include any decline in value of the collateral to an amount which is less than 100% of the repurchase price, any costs of disposing of such collateral, and any loss resulting from any delay in foreclosing on the collateral. The Fund will not enter into any repurchase agreement that would cause more than 15% of its net assets to be invested in repurchase agreements that extend beyond seven days.

Illiquid Investments. The Fund may not purchase or otherwise acquire any illiquid investment if, immediately after the acquisition, the value of the illiquid investments held by the Fund would exceed 15% of the Fund’s net assets. An illiquid investment is any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. Illiquid investments pose risks of potential delays in resale and uncertainty in valuation. Limitations on resale may have an adverse effect on the marketability of portfolio investments and the Fund may be unable to dispose of illiquid investments promptly or at reasonable prices. Under the supervision of the Trust’s Board of Trustees (the “Board”), the Adviser determines the liquidity of the Fund’s investments and, through reports from the Adviser, the Trustees monitor investments in illiquid investments. If through a change in values, net assets, or other circumstances, the Fund was in a position where more than 15% of its net assets were invested in illiquid investments, it would seek to take appropriate steps to bring the Fund’s illiquid investments to or below 15% of its net assets per the requirements of Rule 22e-4 of the 1940 Act. The sale of some illiquid and other types of investments may be subject to legal restrictions.

If the Fund invests in investments for which there is no ready market, the Fund may not be able to readily sell such investments. Such investments are unlike investments that are traded in the open market, and which can be expected to be sold immediately if the market is adequate. The sale price of illiquid investments once realized may be lower or higher than the Fund’s most recent estimate of their fair market value. Generally, less public information is available about issuers of such illiquid investments than about companies whose investments are publicly traded.

Restricted Securities. Within its limitation on investment in illiquid investments, the Fund may purchase restricted securities that generally can be sold in privately negotiated transactions, pursuant to an exemption from registration under the federal securities laws, or in a registered public offering. Where

registration is required, the Fund may be obligated to pay all or part of the registration expense and a considerable period may elapse between the time it decides to seek registration and the time the Fund may be permitted to sell a security under an effective registration statement. If during such a period adverse market conditions were to develop, the Fund might obtain a less favorable price than prevailed when it decided to seek registration of the security.

Restricted securities are generally considered to be illiquid unless it is determined, based upon a review of the trading markets for a specific restricted security, that such restricted security is liquid because it is so-called "4(a)(2) commercial paper" or is otherwise eligible for resale pursuant to Rule 144A under the Securities Act of 1933, as amended ("144A Securities"). Investing in 144A Securities may decrease the liquidity of the Fund's portfolio to the extent that qualified institutional buyers become for a time uninterested in purchasing these restricted securities. The purchase price and subsequent valuation of restricted securities normally reflect a discount, which may be significant, from the market price of comparable securities for which a liquid market exists.

Borrowing Money. The Fund may, to the extent permitted under the 1940 Act, borrow money in order to meet redemption requests or for extraordinary or for emergency purposes. Borrowing involves the creation of a liability that requires the Fund to pay interest. In the event the Fund should ever borrow money under these conditions, such borrowing could increase the Fund's costs and thus reduce the value of the Fund's assets. In an extreme case, if the Fund's current investment income were not sufficient to meet the interest expense of borrowing, it could be necessary for the Fund to liquidate certain of its investments at an inappropriate time.

Lending of Portfolio Securities. In order to generate additional income, the Fund may lend portfolio securities in an amount up to 33 1/3% of its total assets to broker-dealers, major banks, or other recognized domestic institutional borrowers of securities that the Adviser has determined are creditworthy under guidelines established by the Board. In determining whether the Fund will lend securities, the Adviser will consider all relevant facts and circumstances. The Fund may not lend securities to any company affiliated with the Adviser. Each loan of securities will be collateralized by cash, securities, or letters of credit. The Fund might experience a loss if the borrower defaults on the loan.

The borrower at all times during the loan must maintain with the Fund collateral in the form of cash or cash equivalents, or provide to the Fund an irrevocable letter of credit equal in value to at least 100% of the value of the securities loaned. While the loan is outstanding, the borrower will pay the Fund any dividends or interest paid on the loaned securities, and the Fund may invest the cash collateral to earn additional income. Alternatively, the Fund may receive an agreed-upon amount of interest income from the borrower who has delivered equivalent collateral or a letter of credit. It is anticipated that the Fund may share with the borrower some of the income received on the collateral for the loan or the Fund will be paid a premium for the loan. Loans are subject to termination at the option of the Fund or the borrower at any time. The Fund may pay reasonable administrative and custodial fees in connection with a loan, and may pay a negotiated portion of the income earned on the cash to the borrower or placing broker. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the collateral should the borrower fail financially. If the Fund invests the cash collateral from the borrower, there is the risk that such investment may result in a financial loss. In such an event, the Fund would be required to repay the borrower out of the Fund's assets.

Where voting rights with respect to the loaned securities pass with the lending of the securities, the Adviser normally intends to call the loaned securities to vote proxies, or to use other practicable and legally enforceable means to obtain voting rights, when the Adviser believes a material event affecting the loaned securities will occur or the Adviser otherwise believes it necessary to vote.

The Fund’s Custodian serves as Securities Lending Agent for the Fund, and provides services which include screening, selection and review of borrowers, monitoring availability of securities, negotiating rebates, daily marking to market of loans, monitoring and maintaining cash collateral levels, processing securities movements, and reinvesting cash collateral as directed.

Securities Lending Activity for the Fiscal Year 2021	
Gross Income from Securities Lending Activity:	\$339,581
Fees and/or Compensation:	
Revenue Split	\$98,549
Cash Collateral Management	\$7,933
Administrative Fees	\$0
Indemnification Fees	\$0
Rebates Paid to Borrows	\$3,128
Aggregate Fees and/or Compensation:	\$109,620
Net Income from Securities Lending Activity:	\$229,961

Economic and Regulatory Risks. Domestic and foreign governments and agencies thereof often adopt an active approach to managing economic conditions within a nation, which may have material effects on the securities markets within the nation. A government may pursue supportive policies that include, but are not limited to, lowering corporate and personal tax rates and launching stimulative government spending programs designed to improve the national economy or sectors thereof. Agencies of a government, including central banks, may pursue supporting policies that include, but are not limited to, setting lower interest rate targets and buying and selling securities in the public markets. Governments and agencies thereof may also attempt to slow economic growth if the pace of economic growth is perceived to be too great and pose a long-term risk to the economy or a sector thereof. In each instance, the actions taken may be less successful than anticipated or may have unintended adverse consequences. Such a failure or investor perception that such efforts are failing could negatively affect securities markets generally, as well as result in higher interest rates, increased market volatility and reduced value and liquidity of certain securities, including securities held by the Fund.

In addition, governments and agencies thereof may enact additional regulation or engage in deregulation that negatively impacts the general securities markets or a sector thereof. Given the potential broad scope and sweeping nature of some regulatory actions, the potential impact a regulatory action may have on securities held by the Fund may be difficult to determine and may not be fully known for an extended period of time. Accordingly, regulatory actions could adversely affect the Fund.

Changing Fixed Income Market Conditions. Following the financial crisis that began in 2007, the U.S. government and the Board of Governors of the Federal Reserve System (the “Federal Reserve”), as well as certain foreign governments and central banks, took steps to support financial markets, including seeking to maintain interest rates at or near historically low levels and by purchasing large quantities of fixed income securities on the open market, such as securities issued or guaranteed by the U.S. government, its agencies or instrumentalities (“Quantitative Easing”). Similar steps took place again in 2020 in an effort to support the economy during the COVID-19 pandemic. As the Federal Reserve “tapers” or reduces the amount of securities it purchases pursuant to Quantitative Easing, and/or if the Federal Reserve raises the federal funds rate, there is a risk that interest rates will rise. Such policy changes may expose fixed-income and related markets to heightened volatility and may reduce liquidity for certain fixed income investments, including fixed income investments held by the Fund, which could cause the value of the Fund’s investments and share price to decline and/or may increase shareholder redemptions from the Fund. Heavy redemptions could cause the Fund to sell assets at inopportune times or at a loss or depressed value and

could hurt the Fund's performance. To the extent that the Fund invests in derivatives tied to fixed income markets, the Fund will be more substantially exposed to these risks than a fund that does not invest in such derivatives.

Operational Risk. An investment in the Fund involves operational risk arising from factors such as processing errors, human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel and errors caused by third-party service providers. Any of these failures or errors could result in a loss or compromise of information, regulatory scrutiny, reputational damage or other events, any of which could have a material adverse effect on the Fund. While the Fund seeks to minimize such events through controls and oversight, there is no guarantee that the Fund will not suffer losses due to operational risk.

Cybersecurity Risk. The Fund and its service providers may be subject to operational and information security risks resulting from breaches in cybersecurity. A breach in cybersecurity refers to both intentional and unintentional events that may cause the Fund to lose or compromise confidential or proprietary or private personal information, suffer data corruption or lose operational capacity. Breaches in cybersecurity include, among other things, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential, proprietary or private personal information or various other operational disruptions. Successful cybersecurity breaches of the Fund and/or the Fund's investment adviser, distributor, custodian, transfer agent or other third-party service providers may adversely impact the Fund and its shareholders. For instance, a successful cybersecurity breach may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its NAV, cause the release of confidential, proprietary or private personal shareholder information, impede trading, subject the Fund to regulatory fines or financial losses, and/or cause reputational damage. The Fund relies on third-party service providers for many of the day-to-day operations, and is therefore subject to the risk that the protections and protocols implemented by those service providers will be ineffective in protecting the Fund from cybersecurity breaches. Similar types of cybersecurity risks are also present for issuers of securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund's investments in such companies to lose value. There is no guarantee the Fund will be successful in protecting against cybersecurity breaches.

Temporary Defensive Positions. The Fund may, but should not be expected to, take temporary defensive positions that are inconsistent with its principal investment strategies. If the Adviser believes a temporary defensive position is warranted in view of market conditions, the Fund may hold cash or invest up to 100% of its assets in high-quality short-term government or corporate obligations, money market instruments or shares of money market mutual funds. Taking a temporary defensive position may prevent the Fund from achieving its investment objective.

High Portfolio Turnover Risk. To the extent that the Fund makes investments on a shorter-term basis (including in derivative instruments and instruments with a maturity of one year or less at the time of acquisition), the Fund will likely as a result trade more frequently and incur higher levels of brokerage fees and commissions, and cause higher levels of current tax liability to shareholders in the Fund.

Portfolio Turnover. The portfolio turnover rate for the Fund is calculated by dividing the lesser of the Fund's purchases or sales of portfolio securities for the year by the monthly average value of the securities. The Fund's portfolio turnover rate may vary greatly from year to year as well as within a particular year, and may also be affected by cash requirements for redemption of shares. High portfolio turnover rates will generally result in higher transaction costs to the Fund, including brokerage commissions, and may result in additional tax consequences to the Fund's shareholders.

For the fiscal years listed below, the portfolio turnover rates of the Fund were:

Fiscal Year Ended May 31	Portfolio Turnover Rate
2021	12%
2020	52%

INVESTMENT RESTRICTIONS

The Fund has adopted the following fundamental investment limitations that may not be changed without the affirmative vote of a majority of the outstanding shares of the Fund. As used in the Prospectus and this SAI, the term “majority” of the outstanding shares of the Fund means the lesser of (1) 67% or more of the outstanding voting securities of the Fund present at a meeting, if the holders of more than 50% of the outstanding voting securities of the Fund are present or represented at such meeting; or (2) more than 50% of the outstanding voting securities of the Fund. Unless otherwise indicated, percentage limitations apply at the time of purchase of the applicable securities. See the Prospectus for more information about the Fund’s investment objective and investment strategies, each of which are not fundamental and may be changed without shareholder approval.

FUNDAMENTAL RESTRICTIONS. As a matter of fundamental policy:

1. Borrowing Money. The Fund may not engage in borrowing (including, without limitation, borrowing to meet redemptions), except as permitted by the 1940 Act, any rules and regulations promulgated thereunder or interpretations of the SEC or its staff. For purposes of this investment restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing.

2. Senior Securities. The Fund will not issue senior securities, except as permitted by the 1940 Act, the rules and regulations promulgated thereunder or interpretations of the SEC or its staff.

3. Underwriting. The Fund will not act as underwriter, except to the extent that, in connection with the disposition of portfolio securities (including restricted securities), the Fund may be deemed an underwriter under certain federal securities laws or in connection with investments in other investment companies.

4. Real Estate. The Fund will not purchase or sell real estate. This limitation is not applicable to investments in marketable securities which are secured by or represent interests in real estate. This limitation does not preclude the Fund from holding or selling real estate acquired as a result of the Fund’s ownership of securities or other instruments, investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts).

5. Commodities. The Fund will not purchase or sell commodities unless acquired as a result of ownership of securities or other investments. This limitation does not preclude the Fund from purchasing or selling options, forward contracts, or futures contracts, including those relating to indices, or and options on futures contracts or indices, or from investing in securities or other instruments backed by commodities or from investing in companies which are engaged in a commodities business or have a significant portion of their assets in commodities.

6. Loans. The Fund will not make loans to other persons, provided that the Fund may lend its portfolio securities in an amount up to 33% of total Fund assets, and provided further that, for purposes of

this restriction, investments in U.S. Government obligations, short-term commercial paper, certificates of deposit, bankers' acceptances, repurchase agreements and any other lending arrangement permitted by the 1940 Act, any rules and regulations promulgated thereunder or interpretations of the SEC or its staff shall not be deemed to be the making of a "loan". For purposes of this limitation, the term "loans" shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other debt securities.

7. Concentration. The Fund will not invest more than 25% of its total assets in a particular industry or group of industries. This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government (including its agencies and instrumentalities) or, in some instances, state or municipal governments (and their political subdivisions) or repurchase agreements with respect thereto. Investments in registered investment companies may contribute to an industry concentration to the extent that the underlying portfolio of that registered investment company contains investments in a particular industry or group of industries. If the Fund invests in a revenue bond tied to a particular industry, the Fund will consider such investment to be issued by a member of the industry to which the revenue bond is tied.

With respect to the "fundamental" investment restrictions above, if a percentage limitation or standard is adhered to at the time of investment, a later increase or decrease in percentage or departure from the standard resulting from any change in value or net assets or other factors will not result in a violation of such restriction (i.e., percentage limitations are determined at the time of purchase); provided, however, that the treatment of the fundamental restrictions related to borrowing money and issuing senior securities are exceptions to this general rule.

Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

The 1940 Act permits the Fund to borrow money from banks in an amount up to one-third of its total assets (including the amount borrowed) less its liabilities (not including any borrowings but including the fair market value at the time of computation of any other senior securities then outstanding). In general, the Fund may not issue any class of senior security, except that the Fund may (i) borrow from banks, provided that immediately following any such borrowing there is an asset coverage of at least 300% for all Fund borrowings and in the event such asset coverage falls below 300% the Fund will within three days (excluding holidays and Sundays) or such longer period as the SEC may prescribe by rules and regulation, reduce the amount of its borrowings to an extent that the asset coverage of such borrowings shall be at least 300%, and (ii) engage in trading practices which could be deemed to involve the issuance of a senior security, including options, futures, forward contracts and reverse repurchase agreements, provided that the Fund earmarks or segregates liquid assets in accordance with applicable SEC regulations and interpretations.

CALCULATION OF SHARE PRICE

The share price or NAV of shares of the Fund is determined as of the close of the regular session of trading on the New York Stock Exchange (the "NYSE") on each day the NYSE is open for trading. Currently, the NYSE is open for trading on every day except Saturdays, Sundays and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

For purposes of computing the Fund's NAV, securities are valued at market value as of the close of regular trading on the NYSE (normally, 4:00 p.m. Eastern Time) on each business day the NYSE is open. Securities listed on the NYSE or other exchanges are valued based on their last sale prices on the exchanges on which they are primarily traded. If there are no sales on that day, the securities are valued at the mean of the closing bid and ask prices on the NYSE or other primary exchange for that day. National Association of Securities Dealers Automated Quotations ("NASDAQ") listed securities are valued at the NASDAQ Official Closing Price. If there are no sales on that day, the securities are valued at the mean of the most recently quoted bid and ask prices as reported by NASDAQ. Securities traded in the OTC market are valued at the last sale price, if available, otherwise at the mean of the most recently quoted bid and ask prices. In the event that market quotations are not readily available or are considered unreliable due to market or other events, securities and other assets are valued at fair value as determined in good faith in accordance with procedures adopted by the Board. Fixed-income securities are normally valued based on prices obtained from independent third-party pricing services approved by the Board, which are generally determined with consideration given to institutional bid and last sale prices and take into account security prices, yield, maturity, call features, ratings, institutional-sized trading in similar groups of securities and developments related to specific securities. Foreign securities are normally valued on the basis of fair valuation prices obtained from independent third-party pricing services approved by the Board, which are generally determined with consideration given to any change in price of the foreign security and any other developments related to the foreign security since the last sale price on the exchange on which such foreign security primarily traded and the close of regular trading on the NYSE. One or more pricing services may be utilized to determine the fair value of securities held by the Fund. The methods used by independent pricing services and the quality of valuations so established are reviewed by the Adviser and the Fund's administrator (the "Administrator") under the general supervision of the Board. To the extent the assets of the Fund are invested in other open-end investment companies that are registered under the 1940 Act and not traded on an exchange, the Fund's NAV is calculated based upon the NAVs reported by such registered open-end investment companies, and the prospectuses for these companies explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

ADDITIONAL PURCHASE AND REDEMPTION INFORMATION

Shares of the Fund are offered for sale on a continuous basis. Shares are sold and redeemed at their NAV, as next determined after receipt of the purchase or redemption order in proper form.

The Fund may suspend the right of redemption or postpone the date of payment for shares during a period when: (a) trading on the NYSE is restricted by applicable rules and regulations of the SEC; (b) the NYSE is closed for other than customary weekend and holiday closings; (c) the SEC has by order permitted these suspensions; or (d) an emergency exists as a result of which: (i) disposal by the Fund of securities owned by it is not reasonably practicable, or (ii) it is not reasonably practicable for the Fund to determine the value of its assets.

The Fund reserves the right to make payment for a redemption in securities rather than cash, which is known as a "redemption in kind". Redemptions in kind will be made only under extraordinary circumstances and if the Fund deems it advisable for the benefit of its shareholders, such as a very large redemption that could affect Fund operations (for example, more than 1% of the Fund's net assets). A redemption in kind will consist of liquid securities equal in market value to the Fund shares being redeemed, using the same valuation procedures that the Fund uses to compute its NAV. Redemption in kind proceeds will typically be made by delivering a pro-rata amount of the Fund's holdings that are readily marketable securities to the redeeming shareholder within 7 calendar days after the Fund's receipt of the redemption order in proper form. If the Fund redeems your shares in kind, you will bear the market risks associated with maintaining or selling the securities paid as redemption proceeds. In addition, when you sell these

securities, you bear the risk that the securities have become less liquid and are difficult to sell. You also will be responsible for any taxes and brokerage charges associated with selling the securities.

SPECIAL SHAREHOLDER SERVICES

As noted in the Prospectus, the Fund offers the following shareholder services:

Regular Account. The regular account allows for voluntary investments to be made at any time. Available to individuals, custodians, corporations, trusts, estates, corporate retirement plans and others, investors are free to make additions to and withdrawals from their account as often as they wish. When an investor makes an initial investment in the Fund, a shareholder account is opened in accordance with the investor's registration instructions. Each time there is a transaction in a shareholder account, such as an additional investment or a redemption, the shareholder will receive a confirmation statement showing the current transaction.

Automatic Investment Plan. The automatic investment plan enables investors to make regular periodic investments in shares through automatic charges to their checking account. With shareholder authorization and bank approval, the Fund's transfer agent will automatically charge the checking account for the amount specified (\$100 minimum) which will be automatically invested in shares at the NAV on or about the fifteenth or the last business day of the month or quarter, or both. The shareholder may change the amount of the investment or discontinue the plan at any time by writing to the Fund.

Transfer of Registration. To transfer shares to another owner, send a written request to Wavelength Interest Rate Neutral Fund, P.O. Box 46707, Cincinnati, Ohio 45246-0707. Your request should include the following: (i) the Fund name and existing account registration; (ii) signature(s) of the registered owner(s) exactly as the signature(s) appear(s) on the account registration; (iii) if it is for a new account, a completed account application, or if it is for an existing account, the account number; (iv) Medallion signature guarantees (See the heading "How to Redeem Shares – Signature Guarantees" in the Prospectus); and (v) any additional documents that are required for transfer by corporations, administrators, executors, trustees, guardians, etc. If you have any questions about transferring shares, call or write the Fund.

MANAGEMENT OF THE TRUST

Overall responsibility for management and supervision of the Fund and the Trust rests with the Board. The members of the Board (the "Trustees") are elected by the Trust's shareholders or existing members of the Board as permitted under the 1940 Act and the Trust's Agreement and Declaration of Trust (the "Declaration of Trust"). Each Trustee serves for a term of indefinite duration until death, resignation, retirement or removal from office. The Trustees, in turn, elect the officers of the Trust to actively supervise the Trust's day-to-day operations. The officers are elected annually. Certain officers of the Trust also may serve as Trustees.

The Trust will be managed by the Board in accordance with the laws of the State of Ohio governing business trusts. There are currently six Trustees, five of whom are not "interested persons," as defined by the 1940 Act, of the Trust (the "Independent Trustees"). The Independent Trustees receive compensation for their services as Trustees and attendance at meetings of the Board. Officers of the Trust receive no compensation from the Trust for performing the duties of their offices.

Attached in Appendix A is a list of the Trustees and executive officers of the Trust, their year of birth and address, their present position with the Trust, length of time served in their position, their principal occupation(s) during the past five years, and any other directorships held by the Trustees. Those Trustees

who are “interested persons” as defined in the 1940 Act and those Trustees who are Independent Trustees are identified in the table.

Leadership Structure and Qualifications of Trustees

The Board consists of six Trustees, five of whom are Independent Trustees. The Board is responsible for the oversight of the series, or funds, of the Trust.

In addition to the Fund, the Trust has other series managed by other investment advisers. The Board has engaged various investment advisers to oversee the day-to-day management of the Trust’s series. The Board is responsible for overseeing these investment advisers and the Trust’s other service providers in the operations of the Trust in accordance with the 1940 Act, other applicable federal and state laws, and the Declaration of Trust.

The Board meets at least four times throughout the year. The Board generally meets in person, but may meet by telephone or videoconference as permitted by the 1940 Act. In addition, the Trustees may meet in person or by telephone or videoconference at special meetings or on an informal basis at other times. The Independent Trustees also meet at least quarterly without the presence of any representatives of management.

Board Leadership. The Board is led by its Chairperson, Ms. Janine L. Cohen, who is also an Independent Trustee. The Chairperson generally presides at all Board Meetings, facilitates communication and coordination between the Trustees and management, and reviews meeting agendas for the Board and the information provided by management to the Trustees. The Chairperson works closely with Trust counsel and counsel to the Independent Trustees and is also assisted by the Trust’s President, who, with the assistance of the Trust’s other officers, oversees the daily operations of the Fund, including monitoring the activities of all of the Fund’s service providers.

The Board believes that its leadership structure, including having an Independent Trustee serve as Chairperson and five out of six Trustees as Independent Trustees, is appropriate and in the best interests of the Trust. The Board also believes its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from Trust management.

Board Committees. The Board has established the following standing committees:

Audit Committee: The principal functions of the Audit Committee are: (i) to appoint, retain and oversee the Trust’s independent registered public accounting firm; (ii) to meet separately with the independent registered public accounting firm and receive and consider a report concerning its conduct of the audit, including any comments or recommendations it deems appropriate; (iii) to act as the Trust’s qualified legal compliance committee (“QLCC”), as defined in the regulations under the Sarbanes-Oxley Act; and (iv) to act as a proxy voting committee if called upon under the Trust’s Proxy Voting Policies and Procedures when a matter with respect to which a series of the Trust is entitled to vote presents a conflict between the interest of the series’ shareholders, on the one hand, and those of the series’ investment manager on the other hand. Messrs. David M. Deptula, Robert E. Morrison, and Clifford N. Schireson and Meses. Janine L. Cohen and Jacqueline A. Williams are the members of the Audit Committee. Mr. Deptula is the Chairperson of the Audit Committee and presides at its meetings. The Audit Committee met five times during the Fund’s prior fiscal year.

Nominations and Governance Committee (the “Governance Committee”): The Governance Committee nominates and selects persons to serve as members of the Board, including Independent Trustees and “interested” Trustees and assists in reviewing the Trust’s governance practices and standards.

In selecting and nominating persons to serve as Independent Trustees, the Governance Committee will not consider nominees recommended by shareholders of the Trust unless required by law. Messrs. Deptula, Morrison, and Schireson and Ms. Cohen and Williams are the members of the Governance Committee. Mr. Morrison is the Chairperson of the Governance Committee and presides at its meetings. The Governance Committee met four times during the Fund's prior fiscal year.

Qualifications of the Trustees. The Governance Committee reviews the experience, qualifications, attributes and skills of potential candidates for nomination or election by the Board. In evaluating a candidate for nomination or election as a Trustee, the Governance Committee takes into account the contribution that the candidate would be expected to make to the diverse mix of experience, qualifications, attributes and skills that the Governance Committee believes contribute to the oversight of the Trust's affairs. The Board has concluded, based on the recommendation of the Governance Committee, that each Trustee's experience, qualifications, attributes or skills on both an individual basis and in combination with the other Trustees, that each Trustee is qualified to serve on the Board. The Board believes that the Trustees' ability to review critically, evaluate, question and discuss information provided to them, to interact effectively with the Adviser, other service providers, legal counsel and the independent registered public accounting firm, and to exercise effective business judgment in the performance of their duties as Trustees support this conclusion. In determining that a particular Trustee is and will continue to be qualified to serve as a Trustee, the Board considers a variety of criteria, none of which, in isolation, is controlling.

In addition to the Trustee qualifications listed above, each of the Trustees has additional Trustee qualifications including, among other things, the experience identified in the "Trustees and Executive Officers" table included in Appendix A and as follows:

Interested Trustee

David R. Carson is Senior Vice President, Client Strategies for Ultimus Fund Solutions, LLC ("Ultimus"). Mr. Carson is also a Trustee of Unified Series Trust. Mr. Carson served as President of the Trust from 2013 until January 2021, and now serves as Vice President of the Trust. He also serves as President of the Centaur Mutual Funds Trust from 2018 to present. Prior to joining Ultimus in 2013, Mr. Carson served as the Chief Operations and Compliance Officer for The Huntington Funds from 2005 until 2013, for The Flex-Funds from 2006 until 2011, for Meeder Financial from 2007 until 2011, for Huntington Strategy Shares from 2012 until 2013, and for Huntington Asset Advisors during 2013. Mr. Carson also served as Vice President of Huntington National Bank from 2001 until 2013. Mr. Carson holds a B.A. in English from Kenyon College in Gambier, Ohio. Dave was Co-Founder and Director of Advancing Fund Governance, organized for those charged with fund governance to help members best serve shareholders and stakeholders. He is an active member of the Investment Company Institute (ICI) and served as board chair of the Cincinnati Shakespeare Festival. Mr. Carson has been a Trustee since January 2021.

Independent Trustees

David M. Deptula has served as Vice President of Legal and Special Projects for Dayton Freight Lines, Inc. since February 1, 2016. Prior to that position, Mr. Deptula was Vice President of Tax Treasury for Standard Register, Inc. (a company that provides solutions for companies to manage their critical communications, previously The Standard Register Company) since November 2011. (Standard Register, Inc., a newly formed subsidiary of Taylor Corporation, purchased assets of The Standard Register Company on July 31, 2015.) Prior to joining Standard Register, Mr. Deptula was a Tax Partner at Deloitte Tax LLP ("Deloitte"). Mr. Deptula joined Deloitte in 1984 and remained with Deloitte until October of 2011. During his tenure at Deloitte, he was actively involved in providing tax accounting services to open-end mutual funds and other financial services companies. Mr. Deptula holds a B.S. in Accounting from Wright State

University and a Juris Doctor from University of Toledo. He is also a Certified Public Accountant. Mr. Deptula has been a Trustee since June 2012.

Janine L. Cohen, retired, was an executive at AER Advisors, Inc. (“AER”) from 2004 through her retirement in 2013. Ms. Cohen served as the Chief Financial Officer (“CFO”) from 2004 to 2013 and Chief Compliance Officer (“CCO”) from 2008 to 2013 at AER. During her tenure at AER, she was actively involved in developing financial forecasts, business plans, and SEC registrations. Prior to those roles at AER, Ms. Cohen was a Senior Vice President at State Street Bank. Ms. Cohen has over 30 years of experience in the financial services industry. She holds a B.S. in Accounting and Math from the University of Minnesota and is a Certified Public Accountant. Ms. Cohen has been the Chairperson since October 2019 and a Trustee since January 2016.

Jacqueline A. Williams has served as the Managing Member of Custom Strategies Consulting, LLC since 2017, where she provides consulting services to investment managers. Prior to that, she served as a Managing Director of Global Investment Research for Cambridge Associates, LLC since 2005. Earlier in her career, Ms. Williams served as a Principal at Equinox Capital Management, LLC where she was chairperson of the stock selection committee and the firm's financial services analyst. Ms. Williams also served as an Investment Analyst at IBJ Schroder Bank & Trust Company where she monitored U.S. financial services stocks. Ms. Williams has over 25 years of experience in the investment management industry. Ms. Williams earned an A.B. in Religion from Duke University and a Ph.D. in Religious Studies from Yale University. She has been a Chartered Financial Analyst charter holder since 1990. Ms. Williams has been a Trustee since June 2019.

Clifford N. Schireson, retired, was the founder of Schireson Consulting, LLC, which he launched in 2017 until his retirement in 2021. Prior to that, from 2004 to 2017, he was Director of Institutional Services from 2004 to 2017 at Brandes Investment Partners, LP, an investment advisory firm, where he was a member of the fixed-income investment committee. From 1998 to 2004, he was a Managing Director at Weiss, Peck & Greer LLC specializing in fixed-income products for both taxable and municipal strategies for institutional clients. Mr. Schireson has over 20 years of experience in the investment management industry as well as 20 years of experience in the investment banking industry. Mr. Schireson holds an A.B. in Economics from Stanford University and an M.B.A. from Harvard Business School. Mr. Schireson has been a Trustee since June 2019.

Robert E. Morrison serves as a Managing Director at Midwest Trust and FCI Advisors, where he has worked from 2022 to present. Previously, he was a Senior Vice President at Huntington Private Bank, where he worked from 2014 to 2022. From 2006 to 2014, he served as the CEO, President and Chief Investment Officer of 5 Star Investment Management. Mr. Morrison has a B.S. in Forestry Management from Auburn University and is a graduate of the Personal Financial Planning program of Old Dominion University. Mr. Morrison previously served on the Ultimus Managers Trust Board of Trustees as the Founding Chairman of the Trust in 2012. Mr. Morrison retired from the Board in 2014 as a result of a business conflict that no longer exists. Mr. Morrison has over 32 years of financial services experience, focusing on asset management and wealth management. Mr. Morrison has been a Trustee since June 2019.

References above to the qualifications, attributes and skills of Trustees are pursuant to requirements of the SEC, do not constitute holding out the Board or any Trustee as having any special expertise or experience, and shall not impose any greater responsibility on any such person or on the Board by reason thereof.

Risk Oversight. The operation of a mutual fund, including its investment activities, generally involves a variety of risks. As part of its oversight of the Fund, the Board oversees risk through various regular board and committee activities. The Board, directly or through its committees, reviews reports from,

among others, the Adviser, the Trust’s CCO, the Trust’s independent registered public accounting firm, and outside legal counsel, regarding risks faced by the Fund and the risk management programs of the Adviser, with respect to the Fund’s investments and trading activities, and certain service providers. The actual day-to-day risk management with respect to the Fund resides with the Adviser, with respect to the Fund’s investments and trading activities, and other service providers to the Fund. Although the risk management policies of the Adviser and the service providers are designed to be effective, there is no guarantee that they will anticipate or mitigate all risks. Not all risks that may affect the Fund can be identified, eliminated or mitigated and some risks simply may not be anticipated or may be beyond the control of the Board or the Adviser or other service providers. The Independent Trustees meet separately with the Trust’s CCO at least annually, outside the presence of management, to discuss issues related to compliance. Furthermore, the Board receives an annual written report from the Trust’s CCO regarding the operation of the compliance policies and procedures of the Trust and its primary service providers. As part of its oversight function, the Board also may hold special meetings or communicate directly with Trust management or the Trust’s CCO to address matters arising between regular meetings.

The Board also receives quarterly reports from the Adviser on the investments and securities trading of the Fund, including the Fund’s investment performance, as well as reports regarding the valuation of the Fund’s securities (when applicable). The Board also receives quarterly reports from the Administrator, transfer agent (the “Transfer Agent”) and the Distributor on regular quarterly items and, where appropriate and as needed, on specific issues. In addition, in its annual review of the Fund’s investment advisory agreement, the Board reviews information provided by the Adviser relating to its operational capabilities, financial condition and resources. The Board also conducts an annual self-evaluation that includes a review of its effectiveness in overseeing, among other things, the number of funds in the Trust and the effectiveness of the Board’s committee structure.

Trustees’ Ownership of Fund Shares. The following table shows each Trustee’s beneficial ownership of shares of the Fund and, on an aggregate basis, of shares of all funds within the Trust overseen by the Trustee. Information is provided as of December 31, 2021.

Name of Trustee	Dollar Range of Shares of the Fund Owned by Trustee	Aggregate Dollar Range of Shares Owned of All Funds in Trust Overseen by Trustee
<i>Interested Trustee</i>		
David R. Carson	none	\$10,001 - \$50,000
<i>Independent Trustees</i>		
David M. Deptula	None	None
Janine L. Cohen	None	\$50,001 - \$100,000
Jacqueline A. Williams	None	None
Clifford N. Schireson	None	None
Robert E. Morrison	None	None

Ownership In Fund Affiliates. As of December 31, 2021, none of the Independent Trustees, nor members of their immediate families, owned, beneficially or of record, securities of the Adviser, the Distributor or any affiliate of the Adviser or the Distributor.

Trustee Compensation. No director, officer or employee of the Adviser or the Distributor receives any compensation from the Trust for serving as an officer or Trustee of the Trust. Prior to October 20, 2021, each Independent Trustee received a \$500 per meeting fee and a \$1,300 annual retainer for each series of the Trust, except the Chairperson of the Board who received a \$1,500 annual retainer for serving as Chairperson. After October 20, 2021, each Independent Trustee receives a \$550 per meeting fee and a \$1,300 annual retainer for each series of the Trust, except the Chairperson of the Board who receives a

\$1,700 annual retainer for serving as Chairperson. The Trust reimburses each Trustee and officer for his or her travel and other expenses incurred in attending meetings. The following table provides the amount of compensation paid to each Trustee during the Fund's fiscal year ended May 31, 2022.

Name of Trustee	Aggregate Compensation From the Fund	Pension or Retirement Benefits Accrued As Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From all Funds Within the Trust
<i>Interested Trustee</i>				
David R. Carson	None	None	None	None
<i>Independent Trustees</i>

Janine L. Cohen	\$4,200	None	None	\$86,575
Jacqueline A. Williams	\$3,900	None	None	\$79,725
Clifford N. Schireson	\$3,900	None	None	\$79,725
Robert E. Morrison	\$3,900	None	None	\$79,725

Principal Holders of Voting Securities. As of June 22, 2022, the Trustees and officers of the Trust as a group beneficially owned (i.e., had direct or indirect voting and/or investment power) less than 1% of the then-outstanding shares of the Fund. On the same date, the following shareholders owned of record more than 5% of the outstanding shares of beneficial interest of the Fund:

Name and Address of Record Owner	Percentage Ownership
TD AMERITRADE INC/FBO OUR CLIENTS PO BOX 2226 OMAHA, NE 68103-2226	12.78%
CHARLES SCHWAB & CO INC ATTM MUTUAL FUNDS 211 MAIN ST SAN FRANCISCO, CA 94105	11.27%
MORGAN STANLEY SMITH BARNEY LLC/ FOR EXCLUSIVE BENEFIT OF ITS CUSTOMERS 1 NEW YORK PLAZA FL12 NEW YORK, NY 10004-1901	10.92%
LPL FINANCIAL/FBO CUSTOMER ACCOUNTS ATTN MUTUAL FUND OPERATIONS 4707 EXECUTIVE DRIVE SAN DIEGO, CA 92121	9.35%

A shareholder owning of record or beneficially more than 25% of the Fund's outstanding shares may be considered a controlling person. That shareholder's vote could have a more significant effect on matters presented at a shareholders' meeting than the vote of other shareholders.

INVESTMENT ADVISER

Wavelength Capital Management, LLC, located at 21 Bridge Square, 2nd Floor, Westport, Connecticut 06880, serves as the investment adviser to the Fund. The Adviser was formed and commenced

operations in March 2013. Subject to the Fund’s investment objective and policies approved by the Board, the Adviser is responsible for providing the Fund with a continuous program of investing the Fund’s assets and determining the composition of the Fund’s portfolio. The Adviser also provides investment advisory services to separate accounts. The Adviser is controlled by Andrew Dassori and Mark Landis.

The Adviser serves as the investment adviser to the Fund pursuant to the Investment Advisory Agreement dated December 8, 2021 (the “Advisory Agreement”). The Advisory Agreement remains in effect for an initial term of two years and thereafter for periods of one year each only so long as such renewal and continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund’s outstanding voting securities, provided the continuance is also approved by a majority of the Independent Trustees. The Advisory Agreement is terminable without penalty on 10 days’ notice by the Trustees or by vote of a majority of the outstanding voting securities of the Fund. The Adviser may, at any time and without any penalty, terminate the Advisory Agreement upon 60 days’ written notice to the Trust and the Fund. The Advisory Agreement provides that it will terminate automatically in the event of its “assignment,” as such term is defined in the 1940 Act.

Under the Advisory Agreement for its services, the Fund pays the Adviser a monthly investment advisory fee (the “Management Fee”) computed at the annual rate of 0.95% of its average daily net assets. Under an expense limitation agreement (the “Expense Limitation Agreement”), the Adviser has agreed to reduce its investment advisory fees and reimburse Fund expenses to the extent necessary to limit Total Annual Fund Operating Expenses (exclusive of brokerage costs, taxes, interest, borrowing costs such as interest and dividend expenses on securities sold short, Acquired Fund fees and expenses, and extraordinary expenses such as litigation and merger or reorganization costs and other expenses not incurred in the ordinary course of the Fund’s business) to an amount not exceeding 0.99% of its average daily net assets until October 1, 2025. Management Fee reductions and expense reimbursements by the Adviser are subject to repayment by the Fund for a period of three years after the date that such fees and expenses were incurred, provided that the repayment does not cause the Fund’s Total Annual Fund Operating Expenses (exclusive of such reductions and reimbursements) to exceed (i) the expense limitation then in effect, if any, and (ii) the expense limitation in effect at the time the expenses to be repaid were incurred.

The table below provides the compensation paid to the Adviser by the Fund and Management Fee reductions and expense reimbursements made by the Adviser during the fiscal years indicated:

Fiscal Year Ended May 31	Management			Net Advisory
	Management Fees Accrued	Fee Reductions	Expense Reimbursements	Fees Received by Adviser
2021	\$1,157,994	\$321,501	\$0	\$836,493
2020	\$688,052	\$251,041	\$0	\$437,011

The Adviser manages the Fund’s investments in accordance with the stated investment objective and policies of the Fund, subject to the oversight of the Board. The Adviser is responsible for investment decisions, and provides the Fund with a portfolio manager to execute purchases and sales of securities, and investments. The Advisory Agreement provides that the Adviser shall not be liable for any error of judgment or for any loss suffered by the Trust or the Fund in connection with the performance of its duties, except a loss resulting from a breach of fiduciary duty with respect to receipt of compensation for services (in which case any award of damages shall be limited to the period and the amount set forth in Section 36(b)(3) of the 1940 Act) or a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Adviser in the performance of its duties, or from reckless disregard of its duties and obligations thereunder.

Portfolio Manager

The Fund is managed by Andrew Dassori (the “Portfolio Manager”), who is responsible for the day-to-day implementation of investment strategies for the Fund.

Other Accounts Managed by Portfolio Manager

As of the date of this SAI, the Portfolio Manager is not responsible for the day-to-day management of any other accounts.

Potential Conflicts of Interest

The Portfolio Manager’s management of other accounts in the future (the “Other Accounts”), if any, may give rise to potential conflicts of interest in connection with his management of the Fund’s investments, on the one hand, and the investments of the Other Accounts, on the other. A potential conflict of interest may arise where an Other Account has the same investment objective as the Fund, similar strategies or otherwise holds, purchases or sells securities that are eligible to be held, purchased or sold by the Fund. In such conditions, the Portfolio Manager could favor one account over another. Another potential conflict could include the Portfolio Manager’s knowledge about the size, timing and possible market impact of Fund trades, whereby the Portfolio Manager could use this information to the advantage of Other Accounts and to the disadvantage of the Fund or vice versa. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts it manages are fairly and equitably allocated.

A potential conflict of interest may arise as a result of the Portfolio Manager’s day-to-day management of the Fund. The Portfolio Manager knows the size and timing of trades for the Fund and the Other Accounts, and may be able to predict the market impact of the Fund’s trades. It is theoretically possible that the Portfolio Manager could use this information to the advantage of Other Accounts he manages and to the possible detriment of the Fund, or vice versa.

Compensation

Mr. Dassori receives compensation in his capacity as Portfolio Manager through his partial ownership interest in the profits of the Adviser. The profitability of the Adviser is primarily dependent upon the value of the Fund’s assets; however, compensation is not directly based upon the Fund’s performance or the value of the Fund’s assets.

Ownership of Fund Shares

The table below shows the value of shares of the Fund beneficially owned by the Portfolio Manager of the Fund as of the fiscal year ended May 31, 2022 stated as one of the following ranges: None; \$1–\$10,000; \$10,001–\$50,000; \$50,001–\$100,000; \$100,001–\$500,000; \$500,001–\$1,000,000; or over \$1,000,000.

Name of Portfolio Manager	Dollar Range of Shares of the Fund
Andrew G. Dassori	over \$1,000,000

PORTFOLIO TRANSACTIONS

Pursuant to the Advisory Agreement, the Adviser determines, subject to the general supervision of the Board and in accordance with the Fund's investment objective, policies and restrictions, which securities are to be purchased and sold by the Fund and which brokers are eligible to execute the Fund's portfolio transactions.

Purchases and sales of portfolio securities that are debt securities usually are principal transactions in which portfolio securities are normally purchased directly from the issuer or from an underwriter or market maker for the securities. Purchases from underwriters of portfolio securities generally include a commission or concession paid by the issuer to the underwriter, and purchases from dealers serving as market makers may include the spread between the bid and asked prices. Transactions on stock exchanges involve the payment of negotiated brokerage commissions. Transactions in the OTC market are generally principal transactions with dealers. With respect to the OTC market, the Fund, where possible, will deal directly with the dealers who make a market in the securities involved except under those circumstances where better price and execution are available elsewhere.

Allocation of transactions, including their frequency, to various brokers and dealers is determined by the Adviser in its best judgment consistent with its obligation to seek best execution and in a manner deemed fair and reasonable to shareholders. The primary consideration is prompt execution of orders in an effective manner at the most favorable price. Subject to this consideration, brokers who provide investment research to the Adviser may receive orders for equity transactions on behalf of the Fund. Information so received is in addition to and not in lieu of services required to be performed by the Adviser and does not reduce the fees payable to the Adviser by the Fund. Such information may be useful to the Adviser in serving both the Fund and other clients and, conversely, supplemental information obtained by the placement of brokerage orders of other clients may be useful to the Adviser in carrying out its obligations to the Fund. While the Adviser generally seeks competitive commissions, the Fund may not necessarily pay the lowest commission available on each brokerage transaction for the reasons discussed above.

Consistent with the foregoing, under Section 28(e) of the Securities Exchange Act of 1934, as amended, the Adviser is authorized to pay a brokerage commission in excess of that which another broker might have charged for effecting the same transaction, in recognition of the value of brokerage and/or research services provided by the broker. The research received by the Adviser may include, without limitation: information on the United States and other world economies; information on specific industries, groups of securities, individual companies, political and other relevant news developments affecting markets and specific securities; technical and quantitative information about markets; analysis of proxy proposals affecting specific companies; accounting and performance systems that allow the Adviser to determine and track investment results; and trading systems that allow the Adviser to interface electronically with brokerage firms, custodians and other providers. Research is received in the form of written reports, telephone contacts, personal meetings, research seminars, software programs and access to computer databases. In some instances, research products or services received by the Adviser may also be used by the Adviser for functions that are not research related (i.e., not related to the making of investment decisions). Where a research product or service has a mixed use, the Adviser will make a reasonable allocation according to its use and will pay for the non-research function in cash using its own funds.

Subject to the requirements of the 1940 Act and procedures adopted by the Board, the Fund may execute portfolio transactions through any broker or dealer and pay brokerage commissions to a broker (i) which is an affiliated person of the Trust, (ii) which is an affiliated person of such person, or (iii) an affiliated person of which is an affiliated person of the Trust, the Adviser or the Trust's principal underwriter. The Fund paid the following brokerage commissions during the following fiscal years:

Fiscal Year Ended May 31	Brokerage Commission Paid
2021	\$15,544
2020	\$17,188
2019	\$7,674

THE DISTRIBUTOR

The Distributor, located at 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, is the exclusive agent for distribution of shares of the Fund pursuant to a Distribution Agreement (the “Distribution Agreement”) The Distributor is obligated to sell shares of the Fund on a best efforts basis only against purchase orders for the shares. Shares of the Fund are offered to the public on a continuous basis. The Distributor is compensated for its services to the Trust under a written agreement for such services. The Distributor is an affiliate of Ultimus.

By its terms, the Distribution Agreement is effective for periods of one year so long as such renewal and continuance is approved at least annually by (1) the Board or (2) a vote of the majority of the Fund’s outstanding voting shares; provided that in either event continuance is also approved by a majority of the Independent Trustees, by a vote cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement may be terminated at any time, on sixty days written notice, without payment of any penalty, by the Trust or by the Distributor. The Distribution Agreement automatically terminates in the event of its assignment, as defined by the 1940 Act and the rules thereunder. Under the Distribution Agreement, the Distributor was paid \$7,650 in the fiscal year ended May 31, 2021 for its services by the Fund and/or the Adviser.

OTHER SERVICE PROVIDERS

Administrator, Fund Accountant and Transfer Agent

Ultimus, located at 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, serves as the Administrator, fund accountant (the “Fund Accountant”) and Transfer Agent to the Fund pursuant to a Master Services Agreement (the “The Master Services Agreement”).

As Administrator, Ultimus assists in supervising all operations of the Fund (other than those performed by the Adviser under the Fund’s investment advisory agreement with the Adviser). Ultimus has agreed to perform or arrange for the performance of the following services (under the Master Services Agreement, Ultimus may delegate all or any part of its responsibilities thereunder):

- prepare and assemble reports required to be sent to the Fund’s shareholders and arrange for the printing and dissemination of such reports;
- assemble reports required to be filed with the SEC and file such completed reports with the SEC;
- file the Fund’s federal income and excise tax returns and the Fund’s state and local tax returns;
- assist and advise the Fund regarding compliance with the 1940 Act and with its investment policies and limitations; and

- make such reports and recommendations to the Board, as the Board reasonably requests or deems appropriate.

As Fund Accountant, Ultimus maintains the accounting books and records for the Fund, including journals containing an itemized daily record of all purchases and sales of portfolio securities, all receipts and disbursements of cash and all other debits and credits, general and auxiliary ledgers reflecting all asset, liability, reserve, capital, income and expense accounts, including interest accrued and interest received, and other required separate ledger accounts. Ultimus also maintains a monthly trial balance of all ledger accounts; performs certain accounting services for the Fund, including calculation of the NAV per share, calculation of the dividend and capital gain distributions, reconciles cash movements with the custodian, verifies and reconciles with the custodian all daily trade activities; provides certain reports; obtains dealer quotations or prices from pricing services used in determining NAV; and prepares an interim balance sheet, statement of income and expense, and statement of changes in net assets for the Fund.

As Transfer Agent, Ultimus performs the following services in connection with the Fund’s shareholders: maintains records for the Fund’s shareholders of record; processes shareholder purchase and redemption orders; processes transfers and exchanges of shares of the Fund on the shareholder files and records; processes dividend payments and reinvestments; and assists in the mailing of shareholder reports and proxy solicitation materials.

Ultimus receives fees from the Fund for its services as Administrator, Fund Accountant and Transfer Agent, and is reimbursed for certain expenses assumed pursuant to the Master Services Agreement.

The Master Services Agreement between the Trust, on behalf of the Fund, and Ultimus, unless otherwise terminated as provided in the Master Services Agreement, is renewed automatically for successive one-year periods.

The Master Services Agreement provides that Ultimus shall not be liable for any error of judgment or mistake of law or any loss suffered by the Trust in connection with the matters to which the Master Services Agreement relates, except a loss from willful misfeasance, bad faith or gross negligence in the performance of its duties, or from the reckless disregard by Ultimus of its obligations and duties thereunder.

During the fiscal years, listed below, Ultimus received the following fees from the Fund for its services as Administrator, Fund Accountant and Transfer Agent:

Fiscal Year Ended May 31	Fund		
	Administration	Accounting	Transfer Agent
2021	\$122,300	\$42,233	\$19,455
2020	\$72,564	\$37,255	\$18,000
2019	\$49,774	\$34,978	\$18,000

Custodian

U.S. Bank, N.A. (the “Custodian”), located at 425 Walnut Street, Cincinnati, Ohio 45202, serves as custodian to the Fund pursuant to a Custody Agreement. The Custodian’s responsibilities include safeguarding and controlling the Fund’s cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Fund’s investments. The Custodian also serves as Securities Lending Agent for the Fund, and provides services which include screening, selection and review of borrowers, monitoring availability of securities, negotiating rebates, daily marking to market of loans,

monitoring and maintaining cash collateral levels, processing securities movements, and reinvesting cash collateral as directed.

Independent Registered Public Accounting Firm

BBD, LLP, located at 1835 Market Street, 3rd Floor, Philadelphia, Pennsylvania 19103, serves as the independent registered public accounting firm for the Fund for the fiscal year ended May 31, 2022, audits the annual financial statements of the Fund and assists in preparing the Fund's federal, state and excise tax returns for the fiscal year ending May 31, 2023.

Legal Counsel

Kilpatrick Townsend & Stockton LLP, located at 4208 Six Forks Road, Suite 1400, Raleigh, North Carolina 27609, serves as legal counsel to the Trust and the Trust's Independent Trustees.

Compliance Consulting Agreement

Under the terms of a Compliance Consulting Agreement with the Trust, Ultimus provides an individual with the requisite background and familiarity with the Federal securities laws to serve as the Trust's CCO and to administer the Trust's compliance policies and procedures. For these services, the Fund pays Ultimus a base fee, plus an asset-based fee computed as a function of the average net assets of the Fund. In addition, the Fund reimburses Ultimus for its reasonable out-of-pocket expenses relating to these compliance services. For the fiscal year ended May 31, 2021, the Fund paid Ultimus \$14,400 for compliance services.

GENERAL INFORMATION

Other Payments by the Fund. The Fund may enter into agreements with financial intermediaries pursuant to which the Fund may pay financial intermediaries for non-distribution-related sub-transfer agency, administrative, sub-accounting, and other shareholder services. Payments made pursuant to such agreements are generally based on either (1) a percentage of the average daily net assets of Fund shareholders serviced by a financial intermediary, or (2) the number of Fund shareholders serviced by a financial intermediary. Any payments made pursuant to such agreements may be in addition to, rather than in lieu of, distribution fees the Fund may pay to financial intermediaries pursuant to the Fund's distribution plan.

Other Payments by the Adviser. The Adviser and/or its affiliates, in their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Fund, their service providers or their respective affiliates, as incentives to help market and promote the Fund and/or in recognition of their distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to the Fund, the Distributor or shareholders of the Fund through the financial intermediary's retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary's retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing the Fund in a financial intermediary's retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary

personnel about the Fund; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Adviser and/or its affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in the Fund by financial intermediaries' customers, a flat fee or other measures as determined from time to time by the Adviser and/or its affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Adviser through increased fees as Fund assets grow.

Investors should understand that some financial intermediaries may also charge their clients fees in connection with purchases of shares or the provision of shareholder services.

Description of Shares

The Trust is an unincorporated business trust organized under Ohio law on February 28, 2012. The Declaration of Trust authorizes the Board to divide shares into series, each series relating to a separate portfolio of investments, and to further divide shares of a series into separate classes. In the event of a liquidation or dissolution of the Trust or an individual series or class, shareholders of a particular series or class would be entitled to receive the assets available for distribution belonging to such series or class. Shareholders of a series or class are entitled to participate equally in the net distributable assets of the particular series or class involved on liquidation, based on the number of shares of the series or class that are held by each shareholder. If any assets, income, earnings, proceeds, funds or payments are not readily identifiable as belonging to any particular series or class, the Board shall allocate them among any one or more series or classes as the Board, in its sole discretion, deems fair and equitable. Subject to the Declaration of Trust, determinations by the Board as to the allocation of liabilities, and the allocable portion of any general assets, with respect to the Fund are conclusive.

Shares of the Fund, when issued, are fully paid and non-assessable. Shares have no subscription, preemptive or conversion rights. Shares do not have cumulative voting rights. Shareholders are entitled to one vote for each full share held and a fractional vote for each fractional share held. Shareholders of all series and classes of the Trust, including the Fund, will vote together and not separately, except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interests of the shareholders of a particular series or class. Rule 18f-2 under the 1940 Act provides, in substance, that any matter required to be submitted to the holders of the outstanding voting securities of an investment company such as the Trust shall not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding shares of each series or class affected by the matter. A series or class is affected by a matter unless it is clear that the interests of each series or class in the matter are substantially identical or that the matter does not affect any interest of the series or class. Under Rule 18f-2, the approval of an investment advisory agreement, a distribution plan or any change in a fundamental investment policy would be effectively acted upon with respect to a series or class only if approved by a majority of the outstanding shares of such series or class. However, the Rule also provides that the

ratification of the appointment of independent accountants and the election of Trustees may be effectively acted upon by shareholders of the Trust voting together, without regard to a particular series or class.

Trustee Liability

The Declaration of Trust provides that the Trustees will not be liable in any event in connection with the affairs of the Trust, except as such liability may arise from his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties to the Trust and its holders of beneficial interest. It also provides that all third parties shall look solely to the Trust's property for satisfaction of claims arising in connection with the affairs of the Trust. With the exceptions stated, the Declaration of Trust provides that a Trustee or officer is entitled to be indemnified against all liability in connection with the affairs of the Trust.

Trust Liability

Under Ohio law, liabilities of the Trust to third persons, including the liabilities of any series, extend to the whole of the trust estate to the extent necessary to discharge such liabilities. However, the Declaration of Trust contains provisions intended to limit the liabilities of each series to the applicable series and the Trustees and officers of the Trust intend that notice of such limitation be given in each contract, instrument, certificate, or undertaking made or issued on behalf of the Trust by the Trustees or officers. There is no guarantee that the foregoing steps will prove effective or that the Trust will be successful in preventing the assets of one series from being available to creditors of another series.

Code of Ethics

The Trust, the Adviser and the Distributor have each adopted a code of ethics (each a "COE" and, collectively, the "COEs") that is designed to prevent their respective personnel subject to the COEs from engaging in deceptive, manipulative, or fraudulent activities in connection with securities held or to be acquired by the Fund (which securities may also be held by persons subject to the COEs). These COEs permit personnel subject to the COEs to invest in securities, including securities that may be purchased or held by the Fund, but prohibit such personnel from engaging in personal investment activities that compete with or attempt to take advantage of the Fund's planned portfolio transactions. Each of these parties monitors compliance with its respective COE.

Proxy Voting Policies and Procedures

The Trust and the Adviser have adopted Proxy Voting Policies and Procedures that describe how the Fund intends to vote proxies relating to portfolio securities. The Proxy Voting Policies and Procedures of the Trust and the Adviser are attached to this SAI as Appendix C and Appendix D, respectively. No later than August 31st of each year, information regarding how the Fund voted proxies relating to portfolio securities during the prior twelve-month period ended June 30th is available without charge upon request by calling 1-866-896-9292, or on the SEC's website at www.sec.gov.

Portfolio Holdings Disclosure Policy

The Board has adopted policies with respect to the disclosure of a Fund's portfolio holdings. These policies generally prohibit the disclosure of information about a Fund's portfolio to third parties prior to (i) the filing of the information with the Securities and Exchange Commission (the "SEC") in a required filing, or (ii) the day after the information is posted to the Fund's website. Each Fund is required to include a schedule of portfolio holdings in its annual and semi-annual reports to shareholders, which are sent to shareholders within 60 days of the end of the second and fourth fiscal quarters and filed with the SEC on

Form N-CSR within 70 days of the end of the second and fourth fiscal quarters. Each Fund is also required to file a schedule of portfolio holdings with the SEC on Form N-PORT within 60 days of the end of the first and third fiscal quarters. Each Fund must provide a copy of the complete schedule of portfolio holdings as filed with the SEC to any shareholder of the Fund, upon request, free of charge.

As described below, the policies allow for disclosure of non-public portfolio information to third parties if the following criteria are met, as determined by the Trust’s Chief Compliance Officer (the “CCO”): (1) there is a legitimate business purpose for the disclosure; (2) the party receiving the portfolio holdings information is subject to a one or more Conditions of Confidentiality (as defined below); and (3) disclosure is consistent with the antifraud provisions of the federal securities laws and, with respect to disclosure made or directed to be made by the Adviser, the Adviser’s fiduciary duties. “Conditions of Confidentiality” include (1) confidentiality clauses in written agreements, (2) confidentiality implied by the nature of the relationship (e.g., attorney-client relationship), or (3) confidentiality required by fiduciary or regulatory principles (e.g., custody relationships).

Under the policies, the Trust, the Fund, the Adviser and any service provider to the Trust are prohibited from receiving compensation or other consideration in connection with disclosing information about a Fund’s portfolio to third parties.

Consistent with these policies, a Fund may include in marketing literature and other communications to shareholders or other parties a full schedule of portfolio holdings, top ten portfolio positions and certain other portfolio characteristics (such as sector or geographic weightings) that have already been made public through the Fund’s website or through an SEC filing, provided that, in the case of portfolio information made public solely through the Fund’s website, the information is disclosed no earlier than the day after the date of posting to the website.

Each Fund releases non-public portfolio holdings information to certain third-party service providers on a daily basis in order for those parties to perform their duties on behalf of the Fund. These service providers include the Adviser, Distributor, Transfer Agent, fund accounting agent, Administrator and Custodian. Each Fund also periodically discloses portfolio holdings information on a confidential basis to other third parties that provide services to the Fund, such as the Fund’s auditors, legal counsel, proxy voting services (if applicable), printers, brokers and pricing services. The lag between the date of the information and the date on which the information is disclosed will vary based on the nature of the services provided by the party to whom the information is disclosed. For example, the information may be provided to a Fund’s auditors within days after the end of the Fund’s fiscal year in connection with the Fund’s annual audit, while the information may be given to legal counsel or prospective third-party service providers without any time lag.

Below is a table that lists the service provider that currently receive non-public portfolio information along with information regarding the frequency of access to, and limitations on use of, portfolio information.

Type of Service Provider	Access to Typical Frequency of Portfolio Information	Restrictions on Use
Adviser	Daily	Contractual and Ethical
Administrator and Distributor	Daily	Contractual and Ethical
Custodian	Daily	Ethical

Accountants	During annual audit	Ethical
Legal counsel	Regulatory filings, board meetings, and if a legal issue regarding the portfolio requires counsel's review	Ethical
Printers/Typesetters	Twice a year – printing of Semi-Annual and Annual Reports	No formal restrictions in place – typesetter or printer would not receive portfolio information until at least 30 days old
Broker/dealers through which the Fund purchases and sells portfolio securities	Daily access to the relevant purchase and/or sale – no broker/dealer has access to the Fund's entire portfolio	Contractual and Ethical
N-PORT and N-CEN Vendors	Monthly or Annually	Contractual and Ethical
Pricing and Liquidity Vendors	Daily	Contractual and Ethical

The Funds may enter into ongoing arrangements to release portfolio holdings to Morningstar, Inc., Lipper, Inc., Bloomberg, Standard & Poor's, Thompson Financial and Vickers-Stock ("Rating Agencies") in order for those organizations to assign a rating or ranking to the Funds. In these instances, information about a Fund's portfolio would generally be supplied within approximately 25 days after the end of the month. The Rating Agencies may make the Fund's top portfolio holdings and other portfolio characteristics available on their websites and may make the Fund's complete portfolio holdings available to their subscribers for a fee. Neither the Funds, the Adviser, a sub-adviser, nor any of their affiliates receive any portion of this fee.

Upon approval of the CCO, a Fund may also disclose portfolio information pursuant to regulatory request, court order or other legal proceeding.

Except as described above, a Fund is prohibited from entering into any arrangements with any person to make available information about the Fund's portfolio holdings without the prior authorization of the CCO. The Adviser must submit any proposed arrangement pursuant to which it intends to disclose a Fund's portfolio holdings to the CCO, who will review such arrangement to determine whether the arrangement is in the best interests of Fund shareholders. To the extent that the disclosure of a Fund's portfolio holdings information creates a conflict between the Fund, on the one hand, and the Fund's adviser, principal underwriter, and any other affiliated person of the Funds, their investment adviser, or their principal underwriter on the other hand, the CCO shall determine how to resolve the conflict in the best interests of the Fund, and shall report such determination to the Board at the end of the quarter in which such determination was made.

To oversee the Disclosure Policy and the Fund Policy, the Trustees consider reports and recommendations by the CCO regarding the adequacy and implementation of the compliance programs of the Trust and its service procedures adopted pursuant to Rule 38a-1 under the 1940 Act. The Trustees reserve the right to amend the Disclosure Policy at any time without prior notice to shareholders in its sole discretion.

Other Expenses

In addition to the Management Fee, the Fund pays all expenses associated with the Fund not expressly assumed by the Adviser, including, without limitation, the fees and expenses of its independent registered public accounting firm and of its legal counsel; fees of the Administrator, Distributor, and Transfer Agent, the costs of printing and mailing to shareholders Annual and Semi-Annual Reports, proxy statements, prospectuses, SAIs and supplements thereto; bank transaction charges and custody fees; any costs associated with shareholder meetings, including proxy solicitors' fees and expenses; registration and filing fees; federal, state or local income or other taxes; interest; membership fees of the Investment Company Institute and similar organizations; fidelity bond and liability insurance premiums; and any extraordinary expenses, such as indemnification payments or damages awarded in litigation or settlements made.

Benchmark Descriptions

The Fund compares its performance to standardized indices or other measurements of investment performance. Specifically, the Fund compares its performance to the S&P U.S. Treasury Bill 0-3 Month Index, which is a sub-index of the S&P U.S. Treasury Bill Index comprised of the constituents with a 0 to 3-month maturity. Comparative performance may also be expressed by reference to a ranking prepared by a mutual fund monitoring service or by one or more newspapers, newsletters or financial periodicals.

ADDITIONAL TAX INFORMATION

The following summarizes certain additional tax considerations generally affecting the Fund and its shareholders that are not described in the Prospectus. No attempt is made to present a detailed explanation of the tax treatment of the Fund or its shareholders. The discussions here and in the Prospectus are not intended as a substitute for careful tax planning and are based on tax laws and regulations that are in effect on the date hereof; such laws and regulations may be changed by legislative, judicial, or administrative action. Investors are advised to consult their tax advisors with specific reference to their own tax situations.

Qualification as a Regulated Investment Company

The Fund has qualified and intends to remain qualified as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). In order to so qualify, the Fund must elect to be a regulated investment company or have made such an election for a previous year and must satisfy certain requirements relating to the amount of distributions and source of its income for a taxable year. At least 90% of the gross income of the Fund must be derived from dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stocks, securities, or foreign currencies, and other income derived with respect to the Fund's business of investing in such stock, securities, or currencies, and net income derived from an investment in a "qualified publicly traded partnership" as defined in section 851(h) of the Code (the "source-of-income test"). Any income derived by the Fund from a partnership (other than a "qualified publicly traded partnership") or trust is treated as derived with respect to the Fund's business of investing in stock, securities, or currencies only to the extent that such income is attributable to items of income that would have been qualifying income if realized by the Fund in the same manner as by the partnership or trust.

The Fund may not qualify as a regulated investment company for any taxable year unless it satisfies certain requirements with respect to the diversification of its investments at the close of each quarter of the taxable year (the "asset diversification tests"). In general, at least 50% of the value of the Fund's total assets must be represented by cash, cash items, government securities, securities of other regulated investment companies, and other securities which, with respect to any one issuer, do not represent more than 5% of the total assets of the Fund nor more than 10% of the outstanding voting securities of such

issuer. In addition, not more than 25% of the value of the Fund's total assets may be invested in the securities (other than government securities or the securities of other regulated investment companies) of any one issuer; the securities of two or more issuers (other than securities of another regulated investment company) if the issuers are controlled by the Fund and they are, pursuant to Treasury Regulations, engaged in the same or similar or related trades or businesses; or the securities of one or more "qualified publicly traded partnerships."

The Fund intends to satisfy all of the requirements of the source-of-income test and the asset diversification tests on an ongoing basis for continued qualification as a regulated investment company.

If the Fund fails to meet either the asset diversification test with respect to a taxable quarter or the source-of-income test with respect to a taxable year, the Code provides several remedies, provided certain procedural requirements are met, which will allow the Fund to retain its status as a "regulated investment company." There is a remedy for failure to satisfy the asset diversification tests, if the failure was due to reasonable cause and not willful neglect, subject to certain divestiture and procedural requirements and the payment of a tax. In addition, there is a remedy for a de minimis failure of the asset diversification tests, which would require corrective action but no tax. In addition, the Code allows for the remedy of a failure of the source-of-income test, if the failure was due to reasonable cause and not willful neglect, subject to certain procedural requirements and the payment of a tax.

If for any taxable year a Fund does not qualify for the special federal income tax treatment afforded regulated investment companies, all of its taxable income will be subject to federal income tax at regular corporate rates (without any deduction for distributions to its shareholders). Such distributions will be taxable to the shareholders as dividends to the extent of such Fund's current and accumulated earnings and profits. Such distributions may be eligible for (i) the dividends-received deduction ("DRD") in the case of corporate shareholders or (ii) treatment as "qualified dividend income" in the case of noncorporate shareholders, provided in each case that certain holding period and other requirements are met. Failure to qualify as a regulated investment company would have a negative impact on a Fund's income and performance. It is possible that a Fund will not qualify as a regulated investment company in any given tax year.

Fund Distributions

The Fund anticipates distributing substantially all of its investment company taxable income and net tax-exempt interest (if any) for each tax year. Distributions paid to you generally may be characterized as ordinary income. A portion of these distributions may qualify for the DRD when paid to certain corporate shareholders.

Under current tax law, qualifying corporate dividends are taxable at long-term capital gains tax rates. The long-term capital gains rate for individual taxpayers is currently at a maximum rate of 20%, with lower rates potentially applicable to taxpayers depending on their income levels.

Taxable dividends paid by the Fund to corporate shareholders will be taxed at corporate income tax rates. Corporate shareholders may be entitled to a DRD for a portion of the dividends paid and designated by the Fund as qualifying for the DRD.

If the Fund designates a dividend as a capital gains distribution, it generally will be taxable to shareholders as long-term capital gains, regardless of how long the shareholders have held their Fund shares or whether the dividend was received in cash or reinvested in additional shares. All taxable dividends paid by the Fund other than those designated as qualified dividend income or capital gains distributions will be taxable as ordinary income to shareholders, whether received in cash or reinvested in additional shares. To

the extent the Fund engages in increased portfolio turnover, short-term capital gains may be realized, and any distribution resulting from such gains will be considered ordinary income for federal tax purposes.

Certain U.S. shareholders, including individuals and estates and trusts, will be subject to an additional 3.8% Medicare tax on all or a portion of their “net investment income,” which should include dividends from the Funds and net gains from the disposition of shares of the Funds. U.S. shareholders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in a Fund.

Individuals (and certain other non-corporate entities) are generally eligible for a 20% deduction with respect to taxable ordinary dividends from REITs and certain taxable income from publicly traded partnerships. Regulated investment companies that receive qualified REIT dividend income may designate such amounts as Section 199A dividends. Qualified REIT dividend income is the excess of qualified REIT dividends received by the regulated investment company over the amount of the regulated investment company’s deductions that are properly allocable to such income. If the Fund designates a dividend as a Section 199A distribution, it may be treated by shareholders as a qualified REIT dividend that is taxed as ordinary income and for non-corporate taxpayers eligible for the 20% deduction for “qualified business income” under Code section 199A. Generally, only non-corporate shareholders who have held their shares for more than 45 days during the 91-day period beginning on the date which is 45 days prior to the ex-dividend date for such dividend are eligible for such treatment.

Shareholders who hold Fund shares in a tax-deferred account, such as a retirement plan, generally will not have to pay tax on Fund distributions until they receive distributions from their account.

The Fund will designate (1) any distribution that constitutes a qualified dividend as qualified dividend income; (2) any tax-exempt distribution as an exempt-interest dividend; (3) any distribution of long-term capital gains as a capital gain dividend; (4) any dividend eligible for the corporate dividends received deduction; and (5) any distribution that is comprised of qualified REIT dividend income as a Section 199A dividend; as such in a written notice provided to shareholders after the close of the Fund’s taxable year. Shareholders should note that, upon the sale or exchange of Fund shares, if the shareholder has not held such shares for at least six months, any loss on the sale or exchange of those shares will be treated as long-term capital loss to the extent of the capital gain dividends received with respect to the shares.

The Fund will send shareholders information each year on the tax status of dividends and distributions. A dividend or capital gains distribution paid shortly after shares have been purchased, although in effect a return of investment, is subject to federal income taxation. Dividends from net investment income, along with capital gains, will be taxable to shareholders, whether received in cash or reinvested in Fund shares and no matter how long the shareholder has held the Fund’s shares, even if they reduce the NAV of shares below the shareholder’s cost, and thus, in effect, result in a return of a part of the shareholder’s investment.

To the extent that a distribution from the Fund is taxable, it is generally included in a shareholder’s gross income for the taxable year in which the shareholder receives the distribution. However, if the Fund declares a dividend in October, November, or December but pays it in January, it will be taxable to shareholders as if the dividend was received in the year it was declared. Each year, shareholders will receive a statement detailing the tax status of any Fund distributions for that year.

The Fund’s net realized capital gains from securities transactions will be distributed only after reducing such gains by the amount of any available capital loss carryforwards. Capital losses may be carried forward to offset any capital gains.

Excise Tax

A 4% nondeductible excise tax is imposed on regulated investment companies that fail to currently distribute an amount equal to specified percentages of their ordinary taxable income and capital gain net income (excess of capital gains over capital losses). The Fund intends to make sufficient distributions or deemed distributions of its ordinary taxable income and any capital gain net income prior to the end of each calendar year to avoid liability for this excise tax. Investors should note, however, that a Fund might in certain circumstances be required to liquidate portfolio investments to make sufficient distributions to avoid the imposition of any excise tax liability.

Sale, Exchange, or Repurchase of Shares

In general, a shareholder who sells or redeems shares will realize a capital gain or loss, which will be long-term or short-term depending upon the shareholder's holding period for the Fund's shares. An exchange of shares is treated as a sale and any gain may be subject to tax. An exchange of shares is generally treated as a sale and any gain may be subject to tax. All or a portion of any loss so recognized may be disallowed if you purchase (for example, by reinvesting dividends) shares of the same Fund within 30 days before or after the sale, exchange or repurchase (a "wash sale"). If disallowed, the loss will be reflected in an upward adjustment to the basis of the shares purchased.

Shareholders should note that, upon the sale of the Fund's shares, if the shareholder has not held such shares for at least six months, any loss on the sale or exchange of those shares will be treated as a long-term capital loss to the extent of the capital gains dividends received with respect to the shares. Any capital loss arising from the sale, exchange or repurchase of shares held for six months or less, however, will be treated as a long-term capital loss to the extent of the amount of distributions of net capital gain received on such shares. In determining the holding period of such shares for this purpose, any period during which your risk of loss is offset by means of options, short sales or similar transactions is not counted. Capital losses in any tax year are deductible only to the extent of capital gains plus, in the case of a non-corporate taxpayer, \$3,000 of ordinary income.

The repurchase or transfer of shares may result in a taxable gain or loss to a tendering shareholder. Different tax consequences may apply for tendering and non-tendering shareholder in connection with a repurchase offer. For example, if a shareholder does not tender all of his or her shares, such repurchase may not be treated as a sale or exchange for U.S. federal income tax purposes, and may result in deemed distributions to non-tendering shareholder. On the other hand, shareholder holding shares as capital assets who tender all of their shares (including shares deemed owned by shareholders under constructive ownership rules) will be treated as having sold their shares and generally will recognize capital gain or loss. The amount of the gain or loss will be equal to the difference between the amount received for the shares and the shareholder adjusted tax basis in the relevant shares. Such gain or loss generally will be a long-term capital gain or loss if the shareholder has held such shares as capital assets for more than one year. Otherwise, the gain or loss will be treated as short-term capital gain or loss.

Backup Withholding

The Fund will be required in certain cases to withhold and remit to the U.S. Treasury a percentage (currently 24%) of taxable dividends or of gross proceeds realized upon sale paid to shareholders who have failed to provide a correct taxpayer identification number in the manner required, who are subject to withholding by the IRS for failure to include properly on their return payments of taxable interest or dividends, or who have failed to certify to the Fund that they are not subject to backup withholding when required to do so, or that they are "exempt recipients."

Foreign Taxes

Dividends and interest received by the Fund may be subject to income, withholding or other taxes imposed by foreign countries and U.S. possessions that would reduce the yield on the Fund's stock or securities. Tax conventions between certain countries and the U.S. may reduce or eliminate these taxes. Foreign countries generally do not impose taxes on capital gains with respect to investments by foreign investors. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of stocks or securities of foreign corporations, the Fund will be eligible to file an election with the IRS that may enable shareholders, in effect, to receive either the benefit of a foreign tax credit, or a deduction from such taxes, with respect to any foreign and U.S. possessions income taxes paid by the Fund, subject to certain limitations. Pursuant to the election, the Fund will treat those taxes as dividends paid to its shareholders. Each shareholder will be required to include a proportionate share of those taxes in gross income as income received from a foreign source and must treat the amount so included as if the shareholder had paid the foreign tax directly. The shareholder may then either deduct the taxes deemed paid by him or her in computing his or her taxable income or, alternatively, use the foregoing information in calculating any foreign tax credit they may be entitled to use against the shareholders' federal income tax. If the Fund makes the election, the Fund (or its administrative agent) will report annually to its shareholders the respective amounts per share of the Fund's income from sources within, and taxes paid to, foreign countries and U.S. possessions. If the Fund does not hold sufficient foreign securities to meet the above threshold, then shareholders will not be entitled to claim a credit or further deduction with respect to foreign taxes paid by such Fund.

A shareholder's ability to claim a foreign tax credit or deduction in respect of foreign taxes paid by the Fund may be subject to certain limitations imposed by the Code, which may result in a shareholder not receiving a full credit or deduction (if any) for the amount of such taxes. In particular, shareholders must hold their Fund shares (without protection from risk of loss) on the ex-dividend date and for at least 15 additional days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a given dividend. Shareholders who do not itemize on their federal income tax returns may claim a credit (but no deduction) for such foreign taxes. Even if the Fund were eligible to make such an election for a given year, it may determine not to do so. Shareholders that are not subject to U.S. federal income tax, and those who invest in the Fund through tax-advantaged accounts (including those who invest through individual retirement accounts or other tax-advantaged retirement plans), generally will receive no benefit from any tax credit or deduction passed through by the Fund.

State and Local Taxes

Depending upon the extent of the Fund's activities in states and localities in which its offices are maintained, in which its agents or independent contractors are located, or in which it is otherwise deemed to be conducting business, the Fund may be subject to the tax laws of such states or localities. In addition, in those states and localities that have income tax laws, the treatment of the Fund and its shareholders under such laws may differ from their treatment under federal income tax laws.

Foreign Shareholders

The foregoing discussion relates only to U.S. federal income tax law as applicable to U.S. shareholders (i.e., U.S. citizens and residents and U.S. domestic corporations, partnerships, trusts and estates). Non-U.S. shareholders who are not U.S. persons should consult their tax advisers regarding U.S. and foreign tax consequences of ownership of shares of the Fund including the likelihood that taxable distributions to them (including any deemed distributions with respect to a repurchase offer) would be subject to withholding of U.S. tax at a rate of 30% (or a lower treaty rate for eligible investors).

Dividends paid by the Fund to non-U.S. shareholders may be subject to U.S. withholding tax at the rate of 30% unless reduced by treaty (and the shareholder files a valid IRS Form W-8BEN, or other applicable form, with the applicable Fund certifying foreign status and treaty eligibility) or the non-U.S. shareholder files an Internal Revenue Service Form W-8ECI, or other applicable form, with the Fund certifying that the investment to which the distribution relates is effectively connected to a United States trade or business of such non-U.S. shareholder (and, if certain tax treaties apply, is attributable to a United States permanent establishment maintained by such non-U.S. shareholder). The Fund may elect not to withhold the applicable withholding tax on any distribution representing a capital gains dividend to a non-U.S. shareholder.

Under sections 1471 through 1474 of the Code, known as “FATCA”, the Fund is required to withhold U.S. tax at a rate of 30% on payments of taxable dividends and to certain non-U.S. entities that fail to comply (or be deemed compliant) with the extensive reporting and withholding requirements under FATCA designed to inform the U.S. Treasury of certain U.S. owned foreign assets and accounts. Shareholders may be requested to provide additional information to a Fund to enable it to determine whether FATCA withholding is required. The Fund will disclose the information that it receives from (or concerning) its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA, related intergovernmental agreements or other applicable law or regulation. Each prospective investor is urged to consult its tax adviser regarding the applicability of FATCA and any other reporting requirements with respect to the prospective investor’s own situation, including investments through an intermediary.

Cost Basis Reporting

Mutual funds are required to report to the IRS and furnish to fund shareholders the cost basis information for fund shares purchased and/or sold on or after January 1, 2012. In addition to the requirement to report the gross proceeds from the sale of the Fund shares, the Fund is also required to report the cost basis information for such shares and indicate whether these shares had a short-term or long-term holding period. In the absence of an election by a shareholder to elect from available IRS accepted cost basis methods, the Fund will use a default cost basis method. The cost basis method elected or applied may not be changed after the settlement date of a sale of the Fund’s shares. Fund shareholders should consult with their tax advisers concerning the most desirable IRS-accepted cost basis method for their tax situation and to obtain more information about how the new cost basis reporting law applies to them.

Prospective investors should consult with their own tax advisors regarding the application of these provisions to their situation.

FINANCIAL STATEMENTS

The Fund's audited financial statements for the fiscal year ended May 31, 2021, including the Financial Highlights appearing in the Prospectus, are incorporated by reference and made a part hereof. The unaudited financial statements for the six month period ended November 30, 2021, including the financial highlights, appearing in the Semi-Annual Report to shareholders for the Fund are also incorporated by reference and made a part of this document. You may request a copy of the Fund’s [Annual](#) and [Semi-Annual](#) Reports to shareholders at no charge by calling the Fund at 1-866-896-9292 or visiting the Fund’s website at www.wavelengthfunds.com.

APPENDIX B

DESCRIPTION OF RATINGS

The Fund may acquire from time to time fixed income or debt securities as described in the Prospectus and this SAI. The Fund is not restricted with respect to yield, maturity, or credit quality of any fixed income or debt securities, so that the Fund may purchase fixed income or debt securities that are of high quality “investment grade” (“Investment-Grade Debt Securities”) or of lower quality with significant risk characteristics (e.g., “junk bonds”). The various ratings used by nationally recognized statistical rating organizations (each an “NRSRO”) are described below.

A rating by an NRSRO represents the organization’s opinion as to the credit quality of the security being rated. However, the ratings are general and are not absolute standards of quality or guarantees as to the creditworthiness of an issuer. Consequently, the Adviser believes that the quality of Investment-Grade Debt Securities in which the Fund may invest should be continuously reviewed and that individual analysts give different weightings to the various factors involved in credit analysis. A rating is not a recommendation to purchase, sell, or hold a security, because it does not take into account market value or suitability for a particular investor. When a security has received a rating from more than one NRSRO, each rating is evaluated independently. Ratings are based on current information furnished by the issuer or obtained by the NRSROs from other sources that they consider reliable. Ratings may be changed, suspended, or withdrawn as a result of changes in or unavailability of such information, or for other reasons.

S&P® GLOBAL RATINGS. The following summarizes the highest four ratings used by S&P Global Ratings (“S&P”), a division of S&P Global, Inc., for bonds which are deemed to be Investment-Grade Debt Securities by the Adviser:

AAA – An obligation rated “AAA” has the highest rating assigned by S&P. The obligor’s capacity to meet its financial commitments on the obligation is extremely strong.

AA – An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitments on the obligation is very strong.

A – An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitments on the obligation is still strong.

BBB – An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.

Obligations rated “BB,” “B,” “CCC,” “CC,” “C” and “D” are not considered by the Adviser to be Investment-Grade Debt Securities and are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major risk exposures to adverse conditions. An obligation rated “D” is in default or in breach of an imputed promise.

The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

A short-term obligation rated “A-1” is rated in the highest category by S&P and indicates that the obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain

obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitments on these obligations is extremely strong. A short-term obligation rated "A-2" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitments on the obligation is satisfactory.

The rating SP-1 is the highest rating assigned by S&P to short term municipal notes and indicates a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation. The rating SP-2 indicates a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes. The rating SP-3 indicates a speculative capacity to pay principal and interest.

MOODY'S INVESTORS SERVICE, INC. Ratings assigned on Moody's Investors Service, Inc. ("Moody's") global long-term and short-term rating scales are forward-looking opinions of the relative credit risk of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. The highest four ratings are deemed to be Investment-Grade Debt Securities by the Adviser:

Aaa –Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa –Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A –Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

Baa –Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Obligations which are rated Ba, B, Caa, Ca or C by Moody's are not considered "Investment-Grade Debt Securities" by the Adviser. Obligations rated Ba are judged to be speculative and are subject to substantial credit risk. Obligations rated B are considered speculative and are subject to high credit risk. Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.

Short-Term Ratings

Short-term ratings are assigned for obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

P-1 – Issuers (or supporting institutions) rated Prime-1 reflect a superior ability to repay short-term obligations.

P-2 – Issuers (or supporting institutions) rated Prime-2 reflect a strong ability to repay short-term obligations.

P-3 – Issuers (or supporting institutions) rated Prime-3 reflect an acceptable ability to repay short-term obligations.

NP – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

US Municipal Short-Term Debt and Demand Obligation Ratings

Short-Term Obligation Ratings – Moody’s uses the global short-term Prime rating scale for commercial paper issued by U.S. municipalities and nonprofits. These commercial paper programs may be backed by external letters of credit or liquidity facilities, or by an issuer’s self-liquidity. For other short-term municipal obligations, Moody’s uses one of two other short-term rating scales, the Municipal Investment Grade (MIG) and Variable Municipal Investment Grade (VMIG) scales discussed below.

The Municipal Investment Grade (MIG) scale is used to rate U.S. municipal cash flow notes, bond anticipation notes and certain other short term obligations, which typically mature in three years or less. Under certain circumstances, Moody’s uses the MIG scale for bond anticipation notes with maturities of up to five years.

MIG 1 – This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 – This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 – This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG – This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings – In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned. The components are a long-term rating and a short-term demand obligation rating. The long-term rating addresses the issuer’s ability to meet scheduled principal and interest payments. The short-term demand obligation rating addresses the ability of the issuer or the liquidity provider to make payments associated with the purchase-price-upon-demand feature (“demand feature”) of the VRDO. The short-term demand obligation rating uses the Variable Municipal Investment Grade (VMIG) scale. VMIG ratings with liquidity support use as an input the short-term Counterparty Risk Assessment of the support provider, or the long-term rating of the underlying obligor in the absence of third party liquidity support. Transitions of VMIG ratings of demand obligations with conditional liquidity support differ from transitions on the Prime scale to reflect the risk that external liquidity support will terminate if the issuer’s long-term rating drops below investment grade.

Moody’s typically assigns the VMIG short-term demand obligation rating if the frequency of the demand feature is less than every three years. If the frequency of the demand feature is less than three years but the purchase price is payable only with remarketing proceeds, the short-term demand obligation rating is “NR”.

VMIG 1 – This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections.

VMIG 2 – This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections.

VMIG 3 – This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections.

SG – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural or legal protections.

FITCH RATINGS. The following summarizes the highest four ratings used by Fitch Ratings, Inc. (“Fitch”):

National Long-Term Credit Ratings

AAA – “AAA” National Ratings denote the highest rating assigned by Fitch in its National Rating scale for that country. This rating is assigned to issuers or obligations with the lowest expectation of default risk relative to all other issuers or obligations in the same country or monetary union.

AA – “AA” National Ratings denote expectations of a very low level of default risk relative to other issuers or obligations in the same country or monetary union. The default risk inherent differs only slightly from that of the country’s highest rated issuers or obligations.

A – “A” National Ratings denote expectations of a low level of default risk relative to other issuers or obligations in the same country or monetary union.

BBB – “BBB” National Ratings denote a moderate level of default risk relative to other issuers or obligations in the same country or monetary union.

Long-term securities rated below BBB by Fitch are not considered by the Adviser to be Investment-Grade Debt Securities. Securities rated BB denote an elevated default risk relative to other issuers or obligations in the same country or monetary union, and securities rated B denote a significantly elevated level of default risk relative to other issuers or obligations in the same country or monetary union. A rating CCC denotes a very high level of default risk relative to other issuers or obligations in the same country or monetary union, while a rating CC denotes the level of default risk is among the highest relative to other issuers or obligations in the same country or monetary union, and a rating C denotes that a default or default-like process has begun, or the issuer is in standstill, or for a closed funding vehicle, payment capacity is irrevocably impaired. Conditions that are indicative of a C category rating for an issuer include: the issuer has entered into a grace or cure period following non-payment of a material financial obligation, the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation; the formal announcement by the issuer of their agent of a distressed debt exchange; and a closed financing vehicle where payment capacity is irrevocably impaired such that it is not expected to pay interest and/or principal in full during the life of the transaction, but where no payment default is imminent. RD ratings indicate an issuer that, in Fitch’s opinion, has experienced an uncured payment default on a bond, loan or other material financial obligation but that has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure and has not otherwise ceased business. This would include the selective payment default on a specific class or

currency of debt; the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation; the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; or execution of a distressed debt exchange on one or more material financial obligations. D ratings denote an issuer that has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure or that has otherwise ceased business.

National Short-Term Credit Ratings

F1 – Indicates the strongest capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Under Fitch’s National Rating scale, this rating is assigned to the lowest default risk relative to others in the same country or monetary union. Where the liquidity profile is particularly strong, a “+” is added to the assigned rating.

F2 – Indicates a good capacity for timely payment of financial commitments relative to other issuers or obligations in the same country or monetary union. However, the margin of safety is not as great as in the case of the higher ratings.

F3 – Indicates an adequate capacity for timely payment of financial commitments relative to other issuers or obligations in the same country or monetary union.

B – Indicates an uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country or monetary union.

Short-term rates B, C, RD and D by Fitch are considered by the Adviser to be below Investment-Grade Debt Securities. Short-term securities rated C indicates a highly uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country or monetary union. Short-term securities rated RD indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. RD ratings are applicable to entity ratings only. Short-term securities rated D indicate a broad-based default event for an entity, or the default of a short-term obligation.

While the foregoing descriptions of the ratings systems used by the Adviser distinguish between Investment-Grade Debt Securities and more speculative debt securities, as stated above the Fund is not limited with respect to the yield, maturity or credit quality of the debt securities in which it invests. Accordingly, the Fund’s portfolios may be invested in Investment-Grade Debt Securities or debt securities that are not Investment-Grade Debt Securities in any proportion.

APPENDIX C

ULTIMUS MANAGERS TRUST PROXY VOTING POLICIES AND PROCEDURES

PURPOSE; DELEGATION

The purpose of this memorandum is to describe the policies and procedures for voting proxies received from issuers whose securities are held by each series (individually, a “Fund” and collectively, the “Funds”) of Ultimus Managers Trust (the “Trust”). The Board of Trustees of the Trust (the “Board”) believes that each Fund’s Investment Adviser is in the best position to make individual voting decisions for such Fund. Therefore, subject to the oversight of the Board, each Fund’s Investment Adviser is hereby delegated the duty to make proxy voting decisions for such Fund, and to implement and undertake such other duties as set forth in, and consistent with, these Policies and Procedures.

DEFINITIONS

Proxy. A proxy permits a shareholder to vote without being present at annual or special meetings. A proxy is the form whereby a person who is eligible to vote on corporate matters transmits written instructions for voting or transfers the right to vote to another person in place of the eligible voter. Proxies are generally solicited by management, but may be solicited by dissident shareholders opposed to management’s policies or strategies.

Proxy Manager. Proxy manager, as used herein, refers to the individual, individuals or committee of individuals appointed by the investment advisers to each Fund (each, an “Investment Adviser”) as being responsible for supervising and implementing these Policies and Procedures.

POLICY FOR VOTING PROXIES RELATED TO EXCHANGE TRADED FUNDS AND OTHER INVESTMENT COMPANIES.

Pursuant to Section 12(d)(1)(E)(iii) of the Investment Company Act of 1940, all proxies from Exchange Traded Funds (“ETFs”) or other Investment Companies voted by the Fund, registered in the name of the Fund, will have the following voting instructions typed on the proxy form: “Vote these shares in the same proportion as the vote of all other holders of such shares. The beneficial owner of these shares is a registered investment company.”

POLICY FOR VOTING PROXIES RELATED TO OTHER PORTFOLIO SECURITIES

Fiduciary Considerations. Proxies with respect to securities other than ETFs or other investment companies are voted solely in the interests of the shareholders of the Trust. Any conflict of interest must be resolved in the way that will most benefit the shareholders.

Management Recommendations. Since the quality and depth of management is a primary factor considered when investing in a company, the recommendation of management on any issue should be given substantial weight. The vote with respect to most issues presented in proxy statements should be cast in accordance with the position of the company’s management, unless it is determined that supporting management’s position would adversely affect the investment merits of owning the stock. However, each issue should be considered on its own merits, and the position of the company’s management should not be supported in any situation where it is found not to be in the best interests of the Trust’s shareholders.

CONFLICTS OF INTEREST

The Trust recognizes that under certain circumstances an Investment Adviser may have a conflict of interest in voting proxies on behalf of a Fund. Such circumstances may include, but are not limited to, situations where an Investment Adviser or one or more of its affiliates, including officers, directors or employees, has or is seeking a client relationship with the issuer of the security that is the subject of the proxy vote. The Investment Adviser shall periodically inform its employees that they are under an obligation to be aware of the potential for conflicts of interest on the part of the Investment Adviser with respect to voting proxies on behalf of a Fund, both as a result of the employee's personal relationships and due to circumstances that may arise during the conduct of the Investment Adviser's business, and to bring any conflict of interest of which they become aware to the attention of the proxy manager. With respect to securities other than ETFs or other investment companies, the Investment Adviser shall not vote proxies relating to such issuers on behalf of a Fund until it has determined that the conflict of interest is not material or a method of resolving such conflict of interest has been determined in the manner described below. A conflict of interest will be considered material to the extent that it is determined that such conflict has the potential to influence the Investment Adviser's decision-making in voting a proxy. Materiality determinations will be based upon an assessment of the particular facts and circumstances. If the proxy manager determines that a conflict of interest is not material, the Investment Adviser may vote proxies notwithstanding the existence of a conflict. If the conflict of interest is determined to be material, either (i) the conflict shall be disclosed to the Trust's Committee of Independent Trustees (the "Committee") and the Investment Adviser shall follow the instructions of the Committee or (ii) the Investment Adviser shall vote the issue in question based upon the recommendation of an independent third party under a contractual arrangement approved by the Committee. The proxy manager shall keep a record of all materiality decisions and report them to the Committee on an annual basis.

ROUTINE PROPOSALS

Proxies for routine proposals (such as election of directors, selection of independent public accountants, stock splits and increases in capital stock) with respect to securities other than ETFs or other investment companies should generally be voted in favor of management.

PROXY MANAGER APPROVAL

Votes on non-routine matters and votes against a management's recommendations with respect to securities other than ETFs or other investment companies are subject to approval by the proxy manager.

PROXY VOTING PROCEDURES

Proxy voting will be conducted in compliance with the policies and practices described herein and is subject to the proxy manager's supervision. A reasonable effort should be made to obtain proxy material and to vote in a timely fashion. Each Investment Adviser shall maintain records regarding the voting of proxies under these Policies and Procedures.

FORM N-PX

A record of each proxy vote will be entered on Form N-PX. A copy of each Form N-PX will be signed by the President of the Trust. The Form is to be filed by August 31 each year. Each reporting period covered by the Form N-PX runs from July 1 to June 30. The Trust will disclose in its annual and semi-annual reports

to shareholders and in its registration statement (in the SAI) filed with the SEC on or after August 31 that each Fund's proxy voting record for the most recent twelve-month period ended June 30 is available without charge upon request and is also available on the SEC's Website at www.sec.gov.

INVESTMENT ADVISERS' VOTING PROCEDURES

The Trust acknowledges that the Investment Advisers to the various Funds have adopted voting policies and procedures for their clients that have been delivered to the Trust. To the extent that an Investment Adviser's policies and procedures are consistent with these Policies and Procedures, the Investment Adviser may implement them with respect to voting proxies on behalf of each Fund managed by such Investment Adviser. However, the provisions of paragraph 5 of these Policies and Procedures relating to conflicts of interest shall supersede any comparable provisions of any Investment Adviser's policies and procedures.

Securities Lending: If a Fund engages in securities lending, the proxy voting procedures of the Adviser of such Fund will include information on the recall of lent securities for voting purposes. More information can be found in the Securities Lending Procedures of the Trust.

APPENDIX D

WAVELENGTH CAPITAL MANAGEMENT LLC POLICIES AND PROCEDURES FOR VOTING PROXIES

Wavelength Capital Management, LLC has adopted the following proxy voting policies and procedures (the “Proxy Voting Policy”) for the voting of proxies on behalf of client accounts for which Wavelength Capital Management, LLC has voting discretion by contract, including the Wavelength Capital Management, LLC Funds. Under this Proxy Voting Policy, shares are to be voted in a timely manner and in the best interests of the client. Wavelength Capital Management, LLC’s CCO is responsible for monitoring compliance with these policies and procedures.

Routine issues will be voted with management in the majority of cases, while non-routine issues may be more frequently voted against management.

Routine issues include:

- Uncontested elections of Directors, including the number and terms of office, attendance, and the number of meetings held.
- Selection and ratification of auditors.
- Stock splits, dividend, and fractional share issues.
- Application for listing of securities.
- Corporate name changes.
- Pollution, environment, or conservation issues.
- Employment issues.
- Restore or eliminate pre-emptive rights.
- Fees paid to auditors for consultants.
- Business abroad.
- Date, location of annual meeting.
- Contributions to charity or for education.
- All other items which aren’t expected to have a material adverse effect on the price of stock.
- Increases in authorized shares, common or preferred.

Non-Routine Issues include:

- Acquisitions, mergers, and spin-offs.
- Significant changes in the Articles of Incorporation or By-Laws, such as anti-takeover provisions, poison pills, and rights issues.

- Proxy fight or other control contest.
- Remuneration of management, directors, and employees. Employee Stock Option Plans.
- Cumulative voting issues.
- Golden parachute plans or any unusual compensation benefits to be awarded contingent upon the merger or acquisition of the particular company.

In exercising his or her discretion, the Wavelength Capital Management, LLC Portfolio Manager for each client account where shares are held may take into account a variety of factors relating to the matter under consideration, the nature of the proposal and the company involved. As a result, the Portfolio Manager may vote in one manner in the case of one company and in a different manner in the case of another where, for example, the past history of the company, the character and integrity of its management, the role of outside directors, and the company's record of producing performance for investors justifies a high degree of confidence in the company and the effect of the proposal on the value of the investment.

Similarly, poor past performance, uncertainties about management and future directions, and other factors may lead the Portfolio Manager to conclude that particular proposals present unacceptable investment risks and should not be supported. The Portfolio Manager also evaluates proposals in context. A particular proposal may be acceptable standing alone, but objectionable when part of an existing or proposed package. Special circumstances may also justify casting different votes for different clients with respect to the same proxy vote.

Wavelength Capital Management, LLC may choose not to vote proxies in certain situations or for a Client. This may occur, for example, in situations where the exercise of voting rights could restrict the ability to freely trade the security in question (as is the case, for example, in certain foreign jurisdictions known as "blocking markets"). In addition, voting certain international securities may involve unusual costs to clients. In other cases it may not be possible to vote certain proxies despite good faith efforts to do so, for instance when inadequate notice of the matter is provided. In the instance of loan securities, voting of proxies typically requires termination of the loan, so it is not usually in the best economic interests of clients to vote proxies on loaned securities. Wavelength Capital Management, LLC typically will not, but reserves the right to, vote where share blocking restrictions, unusual costs or other barriers to efficient voting apply. If Wavelength Capital Management, LLC does not vote, it would have made the determination that the cost of voting exceeds the expected benefit to the client. The Portfolio Manager shall record the reason for any proxy not being voted, which record shall be kept with the proxy voting records of Wavelength Capital Management, LLC.

Wavelength Capital Management, LLC may occasionally be subject to conflicts of interest in the voting of proxies due to business or personal relationships with persons having an interest in the outcome of certain votes. For example, Wavelength Capital Management, LLC or its affiliates may provide trust, custody, investment management, brokerage, underwriting, banking and related services to accounts owned or controlled by companies whose management is soliciting proxies. Occasionally, Wavelength Capital Management, LLC may also have business or personal relationships with other proponents of proxy proposals, participants in proxy contests, corporate directors or candidates for directorships. Wavelength Capital Management, LLC may also be required to vote proxies for securities issued by its affiliates or on matters in which Wavelength Capital Management, LLC has a direct financial interest, such as shareholder approval of a change in the advisory fees paid by the Fund.

Whether a relationship creates a material conflict will depend on the facts and circumstances. For example, even if the above listed persons do not attempt to persuade Wavelength Capital Management, LLC how to

vote, the "value of the relationship" to Wavelength Capital Management, LLC may create a material conflict. If there is a known or potential conflict, in voting client proxies Wavelength Capital Management, LLC will disclose all such conflicts to its clients and to obtain their consent before voting. It is the responsibility of the CCO to review for any potential conflicts of interest on a regular basis.

Wavelength Capital Management, LLC has implemented the following process to administer proxy voting on behalf of our Clients:

- To avoid excessive storage space, Wavelength Capital Management, LLC retains only one copy of each annual report and proxy statement received from the reporting companies. All others will not be retained.
- All proxy ballots are collected and grouped with that company's annual report and proxy statement.
- Every proxy ballot is recorded via an Excel spreadsheet on the day of receipt by:
 - Broker/dealer/custodian and account number
 - Date received in office of Wavelength Capital Management, LLC
 - Stock symbol
 - Number of shares to be voted
 - Voting deadline
 - Shareholder name – where possible
 - Proxy control number (on proxy statement)
- Once the individual company's proxies are received, that company is assigned to a designated Portfolio Manager.
- For companies with 5000 shares/votes or more, the Wavelength Capital Management, LLC Portfolio Manager for each client account where these shares are held will conduct an in-depth analysis of the entire proxy ballot and all corporate board proposals. This analysis will be conducted to avoid any actual or potential material conflicts of interest. If a conflict of interest is evident after in-depth analysis, Clients will be contacted prior to voting to discuss the exact nature of the conflict and to obtain consent prior to voting. The Portfolio Manager is responsible for maintaining evidence of the client contact.
- For companies with fewer than 5000 shares/votes, the assigned Portfolio Manager votes in the manner that he/she believes is in the best interest of the shareholder(s)/client(s).
- If for some reason, Wavelength Capital Management, LLC determines that it is in the best interest of the client to refrain from voting (i.e. the expense of voting outweighs any benefit, etc.), then the Portfolio Manager maintains documentation to support the reasoning. The CCO is responsible for maintaining evidence of the supporting rationale for abstaining and the client notification.

- After making his/her decision, the designated Portfolio Manager then electronically votes each ballot.
- After voting the proxy ballots, an electronic confirmation of the vote(s) cast are sent to the CCO for his information and possibly comments.
- All electronic confirmations are printed, matched, and attached (by group) with the actual proxy ballots (ballot groupings).
- The reporting company's annual report, proxy statement and ballot groupings are then be preserved and maintained and available for retrieval if requested by any client/shareholder. Wavelength Capital Management, LLC prepares and maintains the following records of its proxy voting:
 - The proxy voting policies and procedures;
 - Copies of proxy statements Wavelength Capital Management, LLC received for client securities;
 - A record of each vote Wavelength Capital Management, LLC cast on behalf of a client;
 - A copy of any document Wavelength Capital Management, LLC created that was material to making a decision on how to vote proxies on behalf of a client or that memorializes the basis for that decision; and
 - A copy of each written client request for information on how Wavelength Capital Management, LLC voted proxies on behalf of the client, and a copy of any written response by Wavelength Capital Management, LLC to any (written or oral) client request for that information on behalf of the requesting client.

Clients are informed how they may obtain these proxy voting policies and procedures through Wavelength Capital Management, LLC's Part 2A of Form ADV, on Wavelength Capital Management, LLC's website, and in the Statement of Additional Information ("SAI") and shareholder's reports for Funds managed by Wavelength Capital Management, LLC.

A report of proxies voted for Funds managed by Wavelength Capital Management, LLC is made quarterly to the Funds' Board, noting any proxies that were voted in exception to the Proxy Guidelines. Wavelength Capital Management, LLC's proxy voting record will also be filed on Form N-PX. An annual record of all proxy votes cast for Funds managed by Wavelength Capital Management, LLC during the most recent 12-month period ended June 30 can be obtained, free of charge, on the Fund's website, and on the SEC's website at www.sec.gov.
